Grand Science Kingdom: The human highest largest science

Shoucai Pan

Corresponding Author: kexx003@163.com

1.Introduction

Editor's note:

In the past without the accurate definition of 'free kingdom', this paper uses the word of the Freedom Kingdom instead of free kingdom. In this paper, with the 'Datong' word is on behalf of: the Great Harmony, Great Unity, one world, TATUNG, Daid, utopia, and so on.

Grand Science Kingdom includes inevitable kingdom and Freedom Kingdom. Unlike in the past, inevitable kingdom respectively with Freedom Kingdom was defined as follows:

If the human history so far -- science to obey politics, is defined as the inevitable kingdom;

So politics obey the science of human society, is called the Freedom Kingdom.

But, so far in human history, there is not inevitable kingdom and Freedom Kingdom accurate definition. The new science of science research shows that, the definition of the two kingdoms and does not define the result and significance, as well as social function, it is very different.

This article, it is on the basis of language unified specification defines, in depth discussed and summarized objective laws of the inevitable kingdom and Freedom Kingdom of the theory and practice aspects.

This kind of guiding significance is lie in, directs and declare publicly human beings, to rely on, learning,

publicity, research, using the theory of new science of science, how to get rid of the "inevitable kingdom", exploit the Freedom Kingdom of the social theory, and how the operability of the practice of 'the Freedom Kingdom' regime, unify the world, achieve Datong -- world Datong -- science ideal country -- The only home to return to human society!

Key words: the new science of science, the Freedom Kingdom, inevitable kingdom, science-ideal country, the world Datong, the truth philosophy, absolute the truth

Inevitable Kingdom and Freedom Kingdom
2.1 About new science of science

So – called the new science of science that is "the new progress in science of science" [3], as shown in the second chapter in this paper. New science of science, namely science of science in the 21st century, than in the 20th century, has bigger progress in theory and is substantial progress.

So - called the science of science that is the science about the science. This is the accurate definition about the science of science.

Science of science must first to the people to answer: what is science?! (At least with accurate definition to answer)

Science of science, and then to the people to answer: what some characteristics, contents, methods, science had, mission, social function and rules and so on? So, science of science is the highest human biggest

sacred management science, and then can uniformly and standardized way manage human of all the problems.

Human whether or not unified and standardized management?

The answer is yes: do you want.

Unified standardized management by whom? How to manage?

The answer is also yes: united and standardized management by science, because the science in science of science has "ten social function" (see chapter 2), which is the only global authority management, so it can realize united standardized management of all the problems of human beings, thus can implement true Freedom Kingdom.

The science of science so-called human of the most fundamental science is that, not only all kinds of academic science must abide strictly by this basic science, and all the human beings, including the ruler, king or fist, without exception, everyday behavior and speech, also must abide strictly by the academic theory.

I was born is a tremendously powerful and unconstrained style, be free and alone, never follow the habit of academic theory, I am the boss. I alone have the final say! -- said of a fist.

Oh, you alone have the final say, it is history, the history of the inevitable kingdom, in which you didn't understand the science! In this kind of history, you is a science of the blind. In the future, in the Kingdom of Freedom, is no longer possible to have a scientific of the blind, can be the powerful and unconstrained style. You, this 'sky horse' must come down to earth, from the sky to the ground, into the iron cage study hard science of science. Then you start all over again!

So science of science summary:

After accurate definition, science has ten holy function of social management.(see chapter 2, outline of new science of science foundation).

Politics is not only to obey the science, and global politics has to honestly behave obey and service in science, may not be the slightest mistake!

The reason is simple: to obey the science, once a mistake, 'politics' immediately becomes a 'rule'. About this, as long as you accurately define 'politics and 'rule', you will understand (See chapter 2).

Visible 'politics and 'rule' is completely different philosophical concepts, should not be confused and in a pot cooking.

Sadly, almost all the people all the time, all confused philosophy concepts of 'politics and 'rule', and in a pot cooking.

In the future, not line!

The difference between the politics and rule also lies in: The global can have a unified politics -- grand unified politics -- Freedom Kingdom politics -- is also called science politics; however, the global 'rule' is always a variety of, and there can be no global unified. Therefore, all the 'rule', no exceptions is: incompatible, absolutely irreconcilable, life and death, vie with each other, will be a duel, and endless struggle, i.e. people usually called the class struggle! -- This also is the human real world -- a kind of inevitable kingdom.

So, the new science of science conclusion:

The only global ending only is the global unified politics -- Freedom Kingdom politics -- science politics -- science Datong (one world) -- science - ideal country -- the only home to return to human society!

Everyone, politics, religion, unconditional obey science only, this is the Freedom Kingdom -- world Datong (one world), this also is the only home to return to human society!

2.2 Concept of two kingdoms

'Inevitable kingdom' words are the first from German: Reich der Notwendigkeit.

Whether inevitable kingdom or Freedom Kingdom, there is no accurate definition, people always use postage stamp sample text to describe the inevitable kingdom and Freedom Kingdom.

However, science of science clear-cut specify: postage stamp sample text, all can't count as defined.

Science of science of 'inevitable kingdom and 'the Free Kingdom' reunification specification accurately defined are as above.

So, this definition has the brand-new significance of global platform of the world Datong. So, to 'inevitable kingdom and 'the free kingdom' the specification of the definition, has very important academic significance.

This paper through the science theory progress, to the dual zone phenomena of the universe / world, i.e. to the inevitable kingdom and the Freedom Kingdom, does try to analysis and discussion and to try best; at the same time points out that the human ideology, science, philosophy, sociology, politics and social, should be how to progress, and put forward constructive academic opinions of operability on the science of science.

Research on science of science and statistical global data show that, check so far in human history, not only there is no the strict, accurate definition of science, and many scholars, advocate 'science' do not need to be strictly defined.

Science of science research shows that:

In the free kingdom story has a lot of, every sentence is the truth, every word in science. Welcome friends to take charge of or a guest.

This is because: the new science of science summarizes for the people "the four cardinal principles of science" (see chapter 2), thus science has the inspectability -- theory inspecting science / the truth / philosophy -- this is the sole criterion for testing science / the truth and philosophy -- useless inspection link through practice inspect in advance science / the truth and philosophy -- useless to surface test in advance the corrupt official corruption!

So, the science of science is the test you:

true or false servant of knocking door's brick, the touchstone for public or private; revolution or counter-revolutionary natural watershed; also is never fading the monster - revealing mirror -- all kinds of the monsters and demons are immediately show oneself in one's true colours!

Science of science is not only test anyone of any theory in advance, and prior inspect anyone's behavior and words on every day. So, science of science has the inspection and management of all human social function.

Science of science, how to inspect and manage all human things?

Very simple, science of science using only two of the most basic rules, can be unified, standardized management of all human things.

One of the most basic rules in science of science is to make language definition. Don't define equal don't

understand, not defined, there is no voice, so for you, can only choice is to learn.

It is sad, the cause of the inevitable kingdom, most of people have been accustomed to without defining disorderly speak, specious, windbaggary, those in the dark try to light the way for others, deceive oneself as well as others, each other of fraud, try to do each other down. All not a line in the future!

Another basic rule is that no time space view have no voice!

The reason is very simple, you do not have the concept of space-time in public, but you have a hidden time space view: God, Islam, Buddhism, and so on.

All not a line in the future. You must open time space view, to have a say.

Therefore, only by definition, science is the people can believe in the truth, and be worthy of the name, thus is inviolable!

In addition to this, heaven and earth are no longer having the truth: also there will be no sacred things.

So friends, please believe, rely on, learning, advertise, research, exploit and utilize, the science of science!

Science of science is not only take you go to the truth, take you success and invincible!

No, take your holy!

So, everyone, politics, religion, unconditional obeys science only, this also is called the Freedom Kingdom, the only home to return to human society.

In the new century science of science according to the definition of 'science' and not defined, summed up in two different conditions as follows:

So far in human history, science is not clearly defined, so:

1) Science is, people, academics, fist, a vague subjective thoughts in mind

2) Science is to serve politics, serve for the proletariat politics, and take a good service

3) Science became ruler, playing with something -- social prostitute

4) Science has become a double - edged sword, good or bad is each half

In this view, war, environmental pollution and destruction, disease and hunger and so on, all are the fault of the double - edged sword of 'science'! To hold "science is good or bad each half -- a two - edged sword

theory" typical representative, is still J.D.Bernal (English) -- global authority of the science of science in the 20th century, in his book "on the road to science of science" said: "...A large portion of scientific careers have been used for the purpose of pure damage, and the nature of modern war due to the application of scientific discoveries, it has become an unprecedented terrible...".

The new science of science research shows that:

Hold" science is good or bad each half -- a two - edged sword theory" scholars, are all guilty of both major mistake:

The first on the one hand of big mistake: don't know, only science, is people can believe in the truth.

In the second big mistake: so don't understand, all man - made disasters on the earth, without exception, all are the fault of careerists ruler with unscrupulous merchants act in collusion each other.

This reason is very simple, in this world has what 'science', let you or him, application of high - tech went to war?! Or to damage the environment?!

If good, the answer is yes, this world forever never such 'science'.

Application of high - tech to wage war, can only be careerist's ruler colluding with unscrupulous traders work, without exception.

This kind of person in addition to don't understand science, and is to deliberately frame science!

So, the new science of science has to conclusion: if, using of high - tech to wage war aspirant ruler and unscrupulous businessmen is the ringleader of mankind, so said, to deliberately frame science, is the human sinner -- full evil.

Sadly, such chief of the wicked villain, most of them in academic circles, would probably just be by your side.

Similarly, careless working and casually mine damage the environment as well as make hunger and disease epidemic, these things also happen in your side.

5) This kind of hazy subjective idea of science, you know, he understand, ordinary being also to know, the fist to understand, scholars understand, talk about science, all mouthful with foam. The just now newly born baby likewise understands science: wow...wow...I want to eat milk...grow up to be a scientist!

6) Because there is no strict scientific definition, the corresponding all human languages as well are not unified, standardized definition, so, logic is a vicious

circle of language itself! As a result, this world there is no the objective truth. Always as a result, has a mouth and then has two layers of skin, how to say it is all right, strength is the commander in chief, fist the lie is the truth.

7) The scholar just meet a soldier, rational couldn't say for sure. Said you do you will do, not all right; say you can't, not, not line.

8) So the human ideology common vicious circles, human society holds a disaster.

Disaster sin! Amen --

--This is called the kingdom of inevitably

--Science to obey the politics

--So far in human history

So, about science, new science of science conclusion:

Huashan (China mountain) since ancient times had only a path, only science can save humanity, only science to unify the global / world.

Save humanity, unify the global, realize Datong -- science Datong -- the Freedom Kingdom, is the science and science of science heavy tasks!

Research on the science of science to show that:

Not only science, and politics, and so on all of the language, also needs to be unified and standardized definitions.

For the 'Politics', too, don't definition equal to don't understand, nor definition, there is no voice, so for your choice can only is to learn.

It is sad: this world, no one seems to don't understand 'politics', who can talk, that is to understand politics, will can write, that also understand politics, no one did not understand politics. Who says you don't understand politics, you will be very urgent and angry! If you say, ruler don't understand the politics, mind you there will be great calamity

Such as:

Someone said, politics is the rule

Someone says: rule is also the politics

Someone says: politics is commander in chief

Someone says: politics is the soul

Someone says: politics, I have the final say

Someone says: the politics is a continuation of the military

Someone says: the military is the continuation of politics

And so on and so on, there is no one but understand politics

But the conclusion on the science of science: you and he said, are all wrong.

Only you have a mouth, there are two layers of leather, how to say how all right; strength is the commander in chief, fist the lie is the truth!

- Global universal establishment
- This is the inevitable kingdom
- So far in human history

Measured by unified specification defines standard of the science of science, very few people really understand 'politics'.

Research of science of science shows that, at all times and in all over the world, all the politics, although is multifarious, but according to the scientific method to classify, the variety of politics can only have two kinds:

One is scientific politics.

The other is unscientific politics.

Never the third kind of politics!

If yes, all the human beings, including you and him, have to make in the two politics choices!

If yes, people are usually able to choose scientific politics. This suggests that, though

people ideology has been a vicious infinite loop -- half drunk, but it is half awake. If someone to choose not scientific politics, may be eating the wrong medicine!

Further study of science of science shows that, from the ancient to modern, Chinese and foreign politics around the world, so far, not yet a scientific politics. The global is all false politics, the true rule, shoddy philosophy, pseudoscience, bad literature. All referred to as all "forged and fake commodity" (as shown in the second chapter).

My politics, have two academies of sciences in the backing, my politics, have the Royal Academy of sciences, and therefore all are scientific politics! -- Some people to say.

Know there is a science in the academy of sciences, this shows that you can still half awake; but did you ever know, because of the existing language to a vicious cycle, in the science academy pseudoscience? -- You're still half drunk!

For example, the Chinese academy of sciences, at least half of pseudoscience! Academy of social sciences, even worse, nine times out of ten is pseudoscience.

If a pseudoscience can manage the country, reminds everybody: as soon as possible to prepare the Last Supper!

But - and I have a lot of "chief scientist" consulting the politics, so it is politics of science! -- Others.

It's a pity that you had those "chief scientist", all is forged and fake commodity!

The reason is very simple, on new science of science

research shows that, so far, human is not a name matches the reality scientist!

Could there be, Isaac Newton and Albert Einstein, not are all human great scientists?! -- One objection to say. Although, Newton, can be said to be a mankind great physicist, but be a scientist, there is a distance of one hundred and eight thousand li (里).

Because there is no denying the fact that is, up to now, and you still don't know what science, s? Ill - affected to tell me!

What are some features of science, content, method, mission, social functions and rules and so on? Newton also did not tell you!

As for Einstein, to leave science than Newton is farther! The reason is simple, in the "Grand Unified Physics" [4] i.e. "The advanced physics", see the appendix 2, and Einstein's theories all have been weeded out the physical sciences.

But still because do not know the "drink water bird" is the second category of perpetual motion machine, Albert Einstein was named by science of science, number one pseudo academics in human science.

Please see the "drink water bird" (perpetual motion bird) video:

<http://www.tudou.com/programs/view/2uhytXscM7s>

Therefore, science to make definition for the second category of perpetual motion machine: those who only use an unordered constant temperature heat source, can be continuous output power of artificial device, is known as the second category of perpetual motion machine.

According to the definition of the above, "drink water bird" is a kind of eligible of the second category of perpetual motion machine.

The study on science of science shows that, so far, human beings have invented the second category of perpetual motion machine a total of five:

The first: thermocouple

The second: drink water birds

The third: heat boiler (only limited to the combustion chamber part of a stove, conform to the definition: only by an unordered heat source continuous output power)

Fourth: unbiased diode (the invention of the Chinese scholars Yelin - Xu).

Fifth: the light - heat power generation semiconductor device (at the same time use light energy and heat energy power generation, emphasis is using heat power generation, power generation efficiency higher than that of photovoltaic cells, this is a patent for utility model and technology of China).

But, due to human physics, including all Einstein's theory, have no, the second category of perpetual motion machine accurate definition, so now the world theory is a mess, therefore, some people say that: wind power, hydropower, and so on, are all the second category of perpetual motion machine.

Obviously this kind of people do not know, wind power, water power are 'orderly' energy, not conform to the definition, so is not the second category of perpetual motion machine.

Others say, atomic structure and motion of celestial body are also the second category of perpetual motion machine.

This kind of people do not understand, whether atomic structure or motion of celestial body, are all not artificial device, so not the second category of perpetual motion machine.

These problems just show, due to the misleading of Einstein's theory of relativity, not only human science theory is very chaos, and did a lot of trouble to human society. So so, science of science made Einstein named as human science top fake scholar, not excessive, be well suited with one's place.

So you have the conclusion: up to now, the human have not a real scientist.

In addition, the study of new science of science shows that, there is no accurate definition, because of philosophy, up to now, global philosophy didn't find the truth, a truth, be worthy of the name truth. So the existing human philosophy, all are for dogs put on snaffle -- at random tie! Please refer to chapter 2 -- the foundation outline on the science of science in the new century.

The literature, originally should be science, but as a result of an illegitimate child, has a mother, but no mother to educate, has corrupted into a novel -- pseudoscience -- bad literature! Please refer to chapter 2 -- the foundation outline on the science of science in the new century.

By the same token, the science of science of the conclusion once again: all human languages need to be unified, standardized definition. There is no unified standard definition is absolutely not.

So the new science of science, have to conclude, solemnly conclude, Just because of human existing language without through scientific and standardized definitions, using the every country language philology to express, all kinds of science, for example, physics,

political science, sociology, philosophy, economics, etc, etc, in the strict sense all are the pseudosciences.

The reason is very simple, at least the language and words all without through scientific unified specification definition, language and words of various countries in the world, without exception, itself logic are all vicious circle, and are all used to serve for domestic political interests or religious beliefs, cannot be used to accurately describe all kinds of science.

So all need science to unified specification definition, to a new level, eventually carry out conform to the science of the theory, logic itself is no longer a vicious cycle, global universal, "datong world lingua franca" -- to unify the global, refer to the eighth chapters -- "datong world lingua franca" as below.

So, in the new century the science of science has the global social function of the four unified standardized management:

First, new science not only unified, standardized manages of all kinds of human science, and unified standardized manages science around the world.

Second, the new science of science can not only unified, standardized management of language and words around the world, but also can generate and has generated, global unified "datong world lingua franca", refer to the eighth chapters -- "datong world lingua franca" as below.

Third, the new science of science can not only unified standardized manage human political science, and unified standardized manage global politics.

Fourth, science can not only unified, standardized manages human sociology, also, unified standardized manages human society, to implement world Datong -- the Freedom Kingdom -- the only home to return to human society.

2.3 The world philosophy first paradox

After all, science is subject to politics or politics obedience science?! -- This is the world first paradox of philosophy.

If yes, almost all of the answer will be: science to obey the politics.

Furthermore replies: science to serve proletarian politics, and a good service.

However, took almost everyone by surprise, science answer will be completely opposite: politics must conscientiously obey and serve the science, shall not be any mistake.

Thus in the human philosophy, there is the unprecedented problem -- the world philosophy first paradox: after all, science is subject to politics or politics obey science?!

This paradox is like hang a interlink lock at paradise's big door. Who can unlock paradise lock, naturally who can enter heavenly nice new life?

The study of new science of science shows that, the following three conditions all can't open the paradise lock:

The first kind of circumstance: all humanity philosophy, without exception, all can't open paradise lock.

Some people don't believe it? try your philosophy!

The second case: all activities for all of humanity, including past, present and future activities, are all helplessness -- to open the heaven lock.

So, practice - sole theory of the countenance go toward where put?!

Some people refuse to obey? Would you please say specific practice!

The third kind of circumstance: AQ is afraid of unlock, because from now on will be cut off revolutionary slogans livelihood.

But the new science of science, using of science and technology -- the first productive force, open the heaven lock, like flick the wrist and supinate to be as easy:

If your science to obey the politics, this suggests that:

First, you politics will certainly not science!

What does that mean unscientific politics?

-- Ignorance and barbarism, the fuck is that ignorance!

Second, at least you don't understand the science, is the eternal truth and sacred science!

Don't believe it? How would you define science?

To definite the science, is your academics' things! -- some people say that.

That --, are you eat cooked rice?

Third, you can't avert suspicion "devils – traitors' logic".

What is "devils - traitors logic" ?

Please see the movie: bong...bong...folks listen up...imperial army this time into the village...East Asia co-prosperity...bong...bong...

Stripling is no experience, impossibly to understand this -- film.

Old faction, will understand, this is called the "devils - traitors logic"!

If your politics to obey science, not only shows that your politics is scientific, also shows you the spiritual civilization is Global One.

"Spiritual civilization Global One", this will be the human a cross-century systems engineering subject.

"Spiritual civilization Global One", also will be human Freedom Kingdom -- datong world of leaders' the preferred characteristic.

It is sad, inevitable kingdom -- the real world, those people, windbaggary "spiritual civilization", have no idea to unlock, whether on the streets in human long history performs, ignorant and dumb Chegal (Chinese), ocean's eleven by a trick -- the skit?! Seemed in this world, only his mother and father gives her a selfless head, and as well grows out a civilization spirit of face!

-- Slowly open eyes and slowly closed again, Lu xun (Chinese) and said.

With "the new progress in science of science"[3], published at home and abroad, has shown that, 'inevitable kingdom' -- "science to obey politics", that is up to 2012 years of human history, has already gone forever.

Since 2013 the human started the Freedom Kingdom -- a new social form, in which human society of the politics to obey science, from then on, humans started a new historical course.

So, "science obeys politics" is the classic philosophy false proposition. In the Freedom Kingdom, people have to put an end to this statement. Instead of the statement is, politics must be honestly, exactitude, obey and service the science, cannot have slightest mistake.

The reason is very simple, obeys the science, once has any mistakes and 'political' immediately becomes a 'rule'.

So 'politics and 'rule' is completely different philosophical concepts, should not be mixed.

2.4 Freedom Kingdom -- Datong world People in social life mirror

In Freedom Kingdom the science possesses ten big social management function, thus, in the Freedom Kingdom -- science Datong -- science ideal country, people in social life mirror is as follows:

The science - ideal country, as the human society a kind of datong, people social life can use the computer simulation demonstrates in the following:

Computer operating system program is the science of science, had enough ability to construct the human highest social productivity, thus, can provide sufficient material and cultural life of the product. and all people can to get each takes what he needs and be to hand.

The computer only simulations demonstrate consumer social life, is as follows:

The science - ideal country people's consumption life is divided into two parts: real living areas, and simulated the living quarters.

Everyone can choose at any time in the real life or simulated living area, to consume, life.

Life mirror at the reality living area:

Everyone is a natural person, because of all the articles for daily use can be each takes what he needs and be to hand. So people need to deliberate choice is lovers every day.

The principle of choosing lovers is absolutely safe and free.

Life mirror of the simulated living area:

On the simulation of living areas there are two kinds of people: one is a natural person, the other kind is the robot.

In addition to can be smartphone operating, robot with natural person is no difference can be observed.

Another difference between robot and a natural person is that, robots are all beauty and first male, posture and facial features is superb, but there is no repeat appearance.

But, there will always be high-grade products, such as interstellar travel and so on: will not be able to satisfy each takes what he needs. Then the computers will automatically timely pop-up democratic distribution frames. For example, use 'the referendum, 'Lottery, 'the minority is subordinate to the majority, 'in turn supply system' and so on, the ways and methods of distribution.

Whether in real life or simulated living quarters, the living environment is: picturesque scenery, birds' twitter and fragrance of flowers, villa and beautiful scenery, a scene of prosperity, four seasons as spring, attractive scenery, shall not use medical and long life.

2.5 basic principle of biology

Why in the science - ideal country -- Freedom Kingdom, people without medical can be many happy returns?

The rule is simple: the research on new science of shows that:

[Basic principle of biology]:

Hydrocarbon (CH) is protein life's basic, nitric hydride (NH) is the protein life's sign; nitric hydride is animal and human body basic gene of all the illness.

[The basic principle of biology inference]: there is only didn't find the pathogenesis of the disease in the world,

not an incurable disease; the so-called incurable disease, because didn't find pathogenesis.

The reason is very simple, all human diseases are made 'nitric hydride' (NH) and its derivatives, include N and H, stir up trouble. A kind of nitric hydride toxicity is the strongest and the most difficult to eliminate to the outside of the body, once the nitric hydride (NH) retention internal body, will generate, various diseases, including an incurable disease. Even if the bacterial inflammation, are also in trouble by nitric hydride (NH). In developed countries, for example, in 2013, bird flu pandemic, this because that, people in developed nations intake more nitric hydride (NH), Immune function is generally lower.

So, grasp the basic principle of biology, not only human cannot diseases and long life!

So, the human happiness social, that is science - ideal country -- science datong -- world datong -- Freedom Kingdom -- the only home to return to human society!

2.6 Conclusion on the science of science

The cause of the inevitable kingdom, all human beings before the 20th century about the theory and ideas of the world datong, contains 'communism datong', because the people don't really understand science and science of science -- the human highest and maximum management science, thus both the east and the west of datong, all belong to unrealistic utopian society fantasy.

In addition, the various religions, in essence is some kind of 'datong consciousness' or fantasy, nothing more, all belong to the subjective idealism datong concept. They and utopian socialism -- fantasy Datong, are birds of a feather.

3 The New Century Science of Science' Foundation Outline

Outline: Research of the science of science shows that, in the new century, science is having a strong social function that is "function of scientific social management and standard". However, due to research of the science of science does not reach the designated position and appear deviation in the 20th century: global science did not play its social function. That, in many countries around the world and social life has appeared chaos and instability situation.

The 21st century "New Progress in Science of Sciences" [3] Studies have shown that, technical reason lie in, represented with J.D.Bernal (English) the 20th century science of science there is no scientific definition,

science research is also not in place, therefore, the social function of "the science" shows, not only the theory is impotence, and the technology is also sexual dysfunction. "The new progress in science of science" of the 21st century not only given the scientific accurate definition, and summarizes "the four cardinal principles of science": "clear concept, accurate definition and reasonable logic, strict rules". Therefore, science has 10 sacrosanct "social functions".

Among them, the first social function is, science commanded global politics. Science of the second social function lies in, science of the four cardinal principles like four pillars of iron, can firmly closed all human governors to iron cage, allow only they are polite, don't allow them to be unruly in word or deed! Science of the first ten social functions, to create the human social science - ideal country -- science datong -- Freedom Kingdom -- world Datong -- the only home to return to human society!

3.1 History in the science of science

In the early 20th century, in the earth's western academic circle has carried out a about "what is science?" i.e. 'the science of science' of big discussion.

In 1925, the polish sociologist Florian Witold Znaniecki for the first time the word 'science of science' is put forward.

In 1935, the polish scholar S.Ossur Minkowski couples, first published in the world."the science of science" article.

Big discussion in 1939, J.D.Bernal (English) with a "the social function of science", authority finished the the 20th century big discussion on the science of science. And as a result, he won the laurel of global authority of the science of science.

But, still J.D.Bernal (English), in the later in "Science in History" [1] concluded that: "science is not a fixed can be defined once and for all the single one". Still later, in 1965, when held the 11th international conference on the history of science, J.D.Bernal (English) delivered his opening speech at the meeting, entitled "on the road to the science of science" [2] said, for science or the science of science, "we also have no need to do a strict definition".

Conclusion of the new science of science: this suggests that, J.D.Bernal (English) can't define science.

However, in the 21st century on science of science research conclusion: don't define equal to don't understand, no definition, there is no voice, so, your only choice can only be learning.

-- This also is one of the most basic rules in science.

Because J.D.Bernal (English) can't define science, so he doesn't understand science. It shows that, J.D.Bernal (English) authority's crown of the science of science in the 20th century not only is invalid, and the science of science in the 20th century big discussion also is invalid. The science of science needs to be anew formed: this is the 21st century new science of science.

However, the 21st century science of science in - depth study shows that, any real, science, its significance is always containing: "clear concept and accurate definition, reasonable logic, strict rules", the basic characteristics of four kinds of common. This determines, any academic theory and the article, its contents must be all at the same time have the 'clear concept 'accurate definition 'reasonable logic and 'strict rules' -- four basic characteristics, then can be science. Otherwise because lack of standardization, are all identified as pseudoscience, by the science of science. So, the 'four characteristics as 'the four cardinal principles', are the difference between 'science and 'pseudoscience' inspection standards. Thus, the new science of science of the four cardinal principles' had the inspectability, this is to say, theory test science and the truth, see the following.

As with science, the truth must also have the above four basic characteristics, otherwise it is not the truth, the following specific discussion.

Sadly, due to the science research of the 20th century, is very bad, So far, almost all the people, have become accustomed to, without definition, disorderly speak. As a result, the human is all in the disaster and bitterness' sea, get locked in strife, each other of fraud. To now, that time is coming, it is, the 21st century's new science of science to bring order out of chaos, make vigorous efforts to turn the situation, and save humanity!

3.2 The science of science of the content and current situation

The 21st century's science of science study shows that, science of science of the basic content as follows: First, what is science afterall?! At least there is a clear definition for answer.

Second, what are science of some features, content, method, mission, social functions and rules, and so on?

First, the science of science is the human highest biggest (management) science, unified standardized management of all human.

Second, the science of science, including all human science: language philology, mathematics, philosophy, sociology, politics and economics, natural science and science to reveals the human beings themselves and so on, without exception.

Third, the science of science is like a father, the rest are all children, philosophy is just one of them.

Fourth, the language philology is richly endowed by nature, ranking is the boss.

The reason is very simple, in this world there is no any science not use language and words express. So language philology natural is the boss.

Fifth, among them the math is also richly endowed by nature, ranking is the second.

The reason is also simple, without mathematics, your philosophy: take what to describe the world?!

Sixth, philosophy is at best ranking third, dj bb remix!

So, from now on you don't pretend to philosophy, with the boss!

Even some people who want to be above the science?!
-- Know-nothing-fearless!

Just because of the drawback of the science of science in the 20th century, people all don't understand the science of science: think that philosophy is the boss. Your philosophy still wants to outmatch science and then fabricate wild tales. This is the current status of human science of science and philosophy.

3.3 New science of science of the social function

New science of science of the four cardinal principles "clear concept and accurate definition, reasonable logic, and strict rules" has the inspectability, the theory of testing the truth, not only can test in advance anyone any theory, without exception, and inspection anyone's words and deeds every day. Thus in the new science of science, science has sacred and authoritative top ten social function, as follows:

The social function 1: science unified standard to manage the (global) politics

The social function 2: science can close global all ruler firmly into iron cage

The social function 3: science to unify standardized global language and words

The social function 4: science by theory for testing the truth

The social function 5: science creates the universe space-time view

The social function 6: science to unify and standardize the management of philosophy

The social function 7: science to unify and standardize the management of the natural sciences

The social function 8: science to create human thought and doctrine of the grand view garden

The social function 9: science to structure human society the highest productivity

The social function 10: science to create human happiness ideal country -- science datong -- Freedom Kingdom -- the only home to return to human society

By contrast, J.D.Bernal (English)'s "scientific social function" is a typical specious, in its Intoxication, Makes Visible, self - deception. Please see the below references [2]: "On the road to science of science".

3.3 The progress of the science of science in the 21st century

The visible, "scientific social functions" of the science of science in the 21st century than in the 20th century has a breakthrough real progress. Clearly visible, in the 20th century science of science of theory, is specious in its Intoxication, Makes, Visible, self - deception, unworthy attend to.

In the world first summarizes and establishes the science of the four cardinal, principles: "clear concept, accurate definition reasonable logic and strict rules". So, in the human society, "politics to obey science" logic, is naturally formed,

"Science to obey politics" logic, no longer is established. From then on, science is no longer a tool for politics service, also no longer playing with something by rulers. So, science of the four cardinal principles like four pillars of iron, can firmly close the human rulers into the iron cage, only allow them exactitude, don't allow them to be unruly in word or deed. So, the 21st century new science of science has for human society opened up to the Freedom Kingdom -- science datong -- world datong, a faction new field.

The important significance of science of the four cardinal principles:

First, the significance is lies first in, using of the "Science Grand Dictionary" uniformly standardized human language and words, thus can be unified, standardized management of humans, the universe and all science. Please refer to the above the social function content of the science.

Second, the second is, you can create a "philosophy of the truth", see the following. This is previous human cannot accomplish significant academic projects.

Third, the significance lie in, new science of science and the four cardinal principles, possessed inspectability -- theory testing science / the truth -- this is the only standard to test science / the truth -- useless through practice inspection link in advance to inspect science / the truth -- useless surfaced, to inspect corrupt official corruption in advance. Therefore, science, and the four cardinal principles can test any person of any theory, no exception.

Fourth, the significance lies in, in addition to test any theory, can also check anyone's daily behavior and words. That is to say, from now on, anyone's words and deeds without exception have to accept the inspection from the science of science and the four cardinal principles.

Fifth, then, science, is to test you (anyone): the a stepping-stone to success(敲门砖) of true or false servant, bang bang; The touchstone in public or private; revolution or counter-revolutionary natural watershed; also is shine on a demon mirror and never fades -- all kinds of the monsters and demons(牛鬼蛇神) was to be show its real form immediately!

Sixth, to use "Science Grand Dictionary", you can create global lingua franca -- "datong world lingua franca". This for the human to realize dream -- go to the world Datong -- Freedom Kingdom, paved the way.

New science of science has completed the manuscript of "Science Grand Dictionary and "Datong world lingua franca". Datong world lingua franca is using three Latin character encoding a Chinese syllable (can use the fourth fifth characters to distinguish homophone), to constitute the language system. See chapter 8 of the Datong world lingua franca.

Seventh, science has two basic rules:

The first basic rule is that science needs accurate definition, don't define equal to don't understand, is not

defined, there is no voice, so, can only be learning science to your choice.

The second is that there is no time space view you also have no voice!

No time space view and disorderly speak: this is the inevitable kingdom of ghostly rampant evil root cause. "There is no time space view, no voice", never heard of it, let us too sad! -- A humanities scholars say. Heard about this time? And it is a must!

The reason is very simple, you don't have a scientific view of time and space, but you have to hide view of time and space: God, Islam, Buddhism, and so on. Science of science research has shown that this is inevitable kingdom, the root cause of human suffering a disaster.

3.4 New science of science create "philosophy of the truth"

Using science of the four cardinal principles, the new science of science can create human grand unified philosophy -- "philosophy of the truth". Further research shows that, in the philosophy of human existing there are three basic reasons for disagreeing:

3.4.1 Human ideological differences

The philosophy of human existing is varied, like a rain of bullets, all say caught the truth, but who said that is wrong, so, can't persuade each other. In fact, this is because people's beliefs are different, that is different ideology. This is first reason producing philosophy of differences in the world.

Further study shows that, regardless of your faith and ideological how piety, also no matter what you claimed that 'objective and ', all is 'subjective idealism', without exception. All subjective idealism thing, neither science nor the truth, more is not philosophy, the following specific argument.

3.4.2 The methodology deviation

In the western academic circles popular "analytic philosophy or "the philosophy of language", there are three aspects of the methodology of academic bias: First, there is no accurate definition of the truth.

Second is trying to "analytic the truth" in the shy and hard to understand language sentence structure.

Third, tend to think that "social real existence is the truth".

These are the philosophical research wrong direction, to form methodology of academic deviation.

3.4.3 Technical reasons philosophy of differences

The new science of science study shows that, in addition to ideological differences, an important technical reason is human existing language and words, historical reasons, without scientific unified specification defines, itself logic to a vicious cycle: "black is white, "good is bad, "revolution is counter-revolutionary "corruption is clean "science is also pseudoscience "relative is absolutely "the truth is fallacy" and so on logic is generally set up, thus in this world, there is no the objective truth. All are, as long as you had a mouth, it is two layers of skin, how do you say how are right, strength is the commander in chief, fist's lie is the truth.

The fact, that merciless indicate, people want to accurate manifestation science and the truth, must have the unified specification defines of language and words via "Science Grand Dictionary", could finish.

Therefore, this requires language and words revolution. That is the literary revolution. The reason is very simple, new science of science research suggests that, literature should be science, but as a result of an illegitimate child, there is a mother to gave birth, but no mother teach, has fallen into a novel -- pseudoscience. This certainly suggests, human language philology -- literature -- culture, all need revolution.

3.4.4 Language revolution

The central content of great revolution for the language and words, is to use the "Science Grand Dictionary", reunification specification definition of human existing language and words, first of all specification definitions of the Chinese language and characters. The reason is very simple, it is Chinese language and characters, in the world first arrive the new science of science of the standards. And then with Chinese language text specification as the blueprint, enact the global universal "lingua franca of the Datong world" (see the chapter 8 of the lingua franca of the Datong world). Then, reuse "lingua franca of the datong world" unified standardizes language and words of all nationalities in the rest of the world.

So far humans have hundreds of artificial language, i.e. "international esperanto", including the current popular "Esperanto", don't can achieve unification of "meaning"

of language and characters, that is, didn't solve the problem of language itself logic vicious circle, and therefore cannot be popularized universal.

However, reunification specification to define language and words, why to talk easy? All kinds of political obstacles needless to say, reunification specification technology itself is huge system engineering. However, the new science of science of research also suggests that, as long as to master the language of 'the outline' -- "five big king kong", specification to define language and words again, will be a lucid exposition of an outline, work will progress smoothly, thereby to generate the "Science Grand Dictionary".

The following specifications define "five big king kong".

3.4.5 Specification to define "five big king kong"

The science of definition

Science definition: objectively reveal nature, including human beings themselves and its society, of the inherent law of essence, through "Science Grand Dictionary" unified specification to define, the language and words, is the science.

Note: this definition highlights, science is originally language and words, no languages, no science. Your dim moonlight subjective thoughts (some knowledge of what the system), is not science. So, science is a thing after human languages. Before people have a language, there can be a technology, for example, monkeys have to climb trees technology, and cats have to catch mice technology, and so on.

Some people say, before humans have a language, the earth is in turn!

So, could you please tell me, "the earth in turn" is come out of your mouth, or from out of the donkey tail root?

If yes, the answer is yes: that from the donkey tail root come out is the donkey manure ball, although also can turn, but not the earth.

This kind of person because ideology malignant death cycle, already do not know: once "the earth in turn" came out from his mouth, it already is the languages!

2) The truth definition

There are two definition of the truth:

The first definition of the truth: the science is the truth.

The second definition of the truth: the eternal, absolute established and effective logic (philosophy) proposition (that is the effective logical language sentence), is the truth.

Comment a: although the two kinds of definition expression is different, But essence meaning identical.

Comment b: only after accurate to define science, "science is the truth" logic can effectively established.

3) The four basic attributes of science and the truth

Science and the truth all possess four basic attributes:

The first attribute -- immutability: all science and the truth is established in the eternal,

in the past / present/future all were established, science and the truth, once found are all invariability.

The inference I: every development and changes of things, chop and change things, all is neither scientific nor the truth.

The second attribute -- absoluteness: all science and the truth must be absolute eternal only set up. and not as time, location, position, angle, view, and change.

The inference II: anything not eternal absolute only set up, and any theory of relativity, neither is likely to be science and cannot be the truth.

Editor's note: visible, Einstein's theory of relativity as well as the philosophical theory of relativity is neither science nor the truth, is an authentic pseudoscience. Criticisms of Einstein's relativity theory, and criticism of the philosophical theory of relativity, see the following.

The third attribute -- objectivity: all science and the truth is objective set up, do not include and exclude anyone's subjective will.

The inference III: Anyone's subjective will, no matter how glorious thought, how brilliant doctrine, how pious belief, thinking consciousness how deep and euphemism, both neither is science nor the truth, more not a philosophy.

Only through definition, science and philosophy is people reliable the truth, and be worthy of the name. Therefore is inviolable. That's beyond, in the heaven and earth, there will be no the truth, also there will be no sacred things.

Academically, science, divides the man's subjective will into "weak, medium, strong" level 3.

The weak level of subjective will, For example: "geocentric theory", "heliocentric theory", and so on, all reflects people's subjective will of the weak level.

Medium subjective will, For example: "theory of relativity, "agnosticism" and so on, all reflects people's medium subjective will.

Strong subjective wills, For example, "idealism, "materialism" and so on, all reflect people subjective will of strong level.

Science of science clearly defined, man's subjective will, regardless of the weak, of the medium or of the strong level, all are not in the realm of science, thus a pseudoscience.

The fourth attribute -- supra - class: all science and the truth is supra - class, and then without class nature. The existence of science and the truth is not dependent on any class existence and objective existence, also not rely on any class's subjective will and then transfer.

The inference IV: so, anything with class nature, without exception, neither is science, nor the truth, more not a philosophy.

So visible, about Marxism, 'ism' is a typical people not only strong subjective will, and openly declared with a class nature, so, this kind of 'ism' is neither scientific, nor the truth, more not a philosophy.

4) Philosophical definition

The so - called philosophy is about the truth of a science (knowledge).

So it's not hard to deduce, the any, don't look for or can't find the truth, 'philosophy', all are give dogs wear snaffle -- random tighten! (给狗代嚼子--胡勒)

It is clear that inevitable kingdom's philosophy -- existing human philosophy, all is so. Therefore, the end of inevitable kingdom philosophy has come to.

5) Political definition

Politics is the management of people also.

Editor's note: this definition is given by China Sun Wen.

So, human only deserve to be called politician is the Sun Wen. That's beyond, humans pre - existing any ruler, without exception, no matter Bagus Flyer, generation tianjiao or best generation of unique person, at best, all can only be the long history physiognomist, They are carrying on their back medicine gourd respective, and respectively operate a suit of punching and kicking -- very can be said to be warlock.

6) Political three natural attributes

New science of science of research shows that politics has three nature attribute:

The first attribute -- scientificity: this is the chiefly attribute of politics. The management of the people should first pay attention to science, rather than the others: what thoughts, what creed or doctrine.

Politics to pay attention to science is called the scientific politics, don't pay attention to science the politics is not scientific politics.

What meaning is unscientific politics? -- ignorance and barbarism! What is ignorance!

The second attribute -- artistry: all political leaders have art of leadership, this is a political artistry.

The third attribute -- democracy: if and only if, when science is not clear the specification of the provisions, management of people can take the form democracy: for example, "the referendum, "the secret ballot" or to use the "lottery" way.

Oh, the democracy is originally to hide in here!

7) Rule definition

Rule: using first impressions are strongest some kind of ideologies, ideas or doctrine (include ism), to implement mandatory uniform management to the people, is called the rule.

8) The rule of three natural attributes

New science of science of the research also suggests that, 'rule' also has three natural attributes:

The first attribute -- non-scientific: rulers, primary care about people unconditional obedience, regardless of the science or not, this is called the public management of non-scientific nature.

The second attribute -- power tactics peculiarity: any ruler has corresponding governance power tactics.

The third attribute -- dictatorship peculiarity: a person in charge let no different opinion.

9) The creation of "Science Grand Dictionary"

The above "five big king Kong" and all other language and words of the unified specification defines included in a folder, this folder is the "Science Grand Dictionary". "Science Grand Dictionary" i.e. the "Datong science dictionary", According to the June 2012 edition of "the modern Chinese dictionary (6th edition)", included 13000 individual characters, 69000 words entry.

3.4.6 The creation of "philosophy of the truth"

1) The definition of "philosophy of the truth"

Had "Science Grand Dictionary", it is very easy to create human grand unified philosophy -- "philosophy of the truth". As the name suggests, the so-called "philosophy of the truth", it is that a science (knowledge), in which people to research, discuss, look for, discover and apply the truth. See the following.

2) Critique of dialectics

Obviously "philosophy of the truth" of the creating process that also is the process of critique of dialectics.

Originally, dialectics is a method of sophistry. The crucial point of dialectics just is that, use people with the naked eye visible things of surface phenomenon in the nature -- continuous development of change, to deny,

people use the naked eye in the nature are not visible, essence of internal law -- eternal invariable science and the truth.

In this sense, dialectics is that the reactionary theory, which is anti science and the truth, need a thorough criticism. Make dialectic become a person hated by everyone -- kill him!

3) Philosophy of the truth to find/search for truth

Languages after the unified specification defines through "Science Grand Dictionary", it is easy to find and discover the truth, eternal absolute the truth. And eternal absolute the truth is everywhere run, see you looking for or not! Obviously, dialectics is not only can't find the truth, and spare no effort to completely deny the eternal absolute the truth! So the dialectics is completely sophistry fallacy!

Please have a look at a philosophical proposition: "a man can't walk into the same river twice".

This is the ancient Greek scholar Heraclitus created genius philosophical proposition. But not only Heraclitus himself, but so far all don't know, this proposition because is eternal definitely established, by definition it is a truth, eternal absolute the truth. This is a "philosophy of the truth" by the science of science searched and discovered for human. According to the order this is the first human philosophy truth: The following will successively study / discover the truth, and in proper order prioritize.

4) Create philosophy space - time view

Science of science study shows that, as a full qualified philosophy, must have their own space-time view, no time - the philosophy no space view all is beating their gums. Spun eight wide!

5) To create the universe time coordinates system

Science of science study shows that, the Heraclitus genius philosophical proposition, using the "philosophy of the truth" of philosophical language as an anew expression is as follows:

"One cannot step twice into the same history long river".

Further research shows that, this proposition reveals is the inherent nature of an objective law of the universe -- the basic nature of the universe absolute time coordinates system: the time in the universe is eternal, absolute, objective unidirectional uniform loss, headless tailless, can be used to characterize the order of things or processes of a measure. This kind of measurement can be called "time". The original method of the measurement of time, 'hourglass or 'drip' technique can be used to implement.

It's not hard to find, the universe time there are three kinds of natural property: long or short, more or less, unidirectional uniform loss. Practical experience shows that, the time never has a curved nature.

- To prove time properties of unidirectional uniform loss Using reduction to absurdity is easy to prove, the time is a one-way uniformly lost: if time is not a one - way uniformly lost, so will inevitably occur one twice into the same history long river of the phenomenon. So you have the conclusion, the time is only a unidirectional uniform loss!

- Science of the reduction to absurdity

The so-called "scientific of the reduction to absurdity", that is, the first assumption, as a kind of logical proposition is true, which is a negative the truth of the logic proposition, then proceed effective logical reasoning, the results clearly demonstrated, the logic proposition -- "against the truth" cannot be established, so clearly proved a positive logic propositional the truth is established.

Visible, science of the reduction to absurdity is very useful, very useful for study of science and philosophy. "Science of the reduction to absurdity" can often be used in the future. And so, the "science of the reduction to absurdity" is one of the science effective study method.

- Prove time one-way irreversible properties

Further research shows that, due to the philosophy be congenitally deficient, scientific research is not in place, coupled with the theory of relativity is misleading, people have tended to think, taking a superluminal craft, people can return to history.

Science of science study shows that, this is absolutely impossible!

The reason is very simple, even if you take the superluminal craft, you can only see the historical images of a single 'light spot', can't see the whole "history image".

So, can clear conclusion, time is a one - way irreversible loss.

- 'Simultaneity' absoluteness of the proof also using the reduction to absurdity, it is easy to prove 'simultaneity' absoluteness. If

the time in the universe 'simultaneity' is not absolute, is relative, then the universe things must appear 'disorder or 'conflict' situation. However, in fact not, it also is impossible. So you have to the conclusion that time in

the universe 'simultaneity' must be absolute.

So, Einstein was defined 'meanwhile' with the speed of light, obvious mistakes, it also is not allowed by science.

- Prove time will not bend

Time will never never bending properties, it can also be used scientific of reduction to absurdity to prove. If the time is curved, someone will twice into the same history long river. According to the philosophy of the first truth, this is not possible.

6) The creation of universe space coordinate system

- Article 2 the truth of philosophy

Please see another philosophical proposition: "two persons cannot enter the same history long river at the same time".

This is this paper takes the lead in creating the philosophical proposition in the world. Obviously this also is a permanent established absolutely effective logical philosophical proposition, thus also is a timeless absolute the truth. According to the order, this is the article 2 philosophy eternal absolute truth.

- Universe space absolute coordinate system

The second truth revealed another inherent nature objective law of the universe, that is the absolute space coordinate system of the basic nature in the universe: the space in the universe, is absolute, objective, can use three orthogonality rulers of equal scale, to represent a measure. This measure is called universe space.

Also it is not hard to find, cosmic space also has three types of natural attributes: large and small, more with less and position. Intuitive experience also suggests that space has never bent natural quality. Such as a sphere, its surface's domain is curved; but don't say, "Space is curved".

- There is no curved space in the universe

Cosmic space is not bending properties can be logical proof. Also with the reduction to absurdity, if the cosmic space is curved, so there will inevitably be 'philosophy cavity or the 'worm hole'; so there will be two people at the same time into the same history long river. This is not possible!

So you have the conclusion: cosmic space is not bending properties. So, Einstein's theory of relativity 'bending time 'curved space 'curved space - time' are all belong to pseudoscience fabricate product, be utterly unjustifiable. Should be banned!

7) Continue to look for the truth

- According to article 2 the truth, to infer a philosophical proposition:

"Two people cannot find the same truth at the same time".

Obviously, by definition, it also is a timeless absolute established effective logical proposition, thus is a timeless absolute the truth. According to the order, this is the article 3 philosophical truth.

•Another corollary proposition:"the truth is always in the beginning in one's hands". This proposition also eternity is absolutely true, and hence a timeless absolute the truth.

For example, two people cannot find the "science and technology is the first productive force" at the same time". Which shows that two people cannot find the same truth at the same time? Its philosophy article 4 the truth.

•The "science and technology is the first productive force" itself is a eternal absolute established effective logical philosophical proposition, thus a timeless absolute the truth again. According to the order, this is the philosophy of article 5 the truth.

8) Philosophy of prejudice

By contrast, see philosophical proposition: "sometimes the truth is in a few hands".

This was, and still is, stewed moxibustion population of philosophy of the famous proposition. However, philosophy population all not to understand so far, in spite of this proposition logic is also established, but not absolutely eternally established, so is not the truth.

Precisely because: "sometimes the truth is in most people hands".

So, no matter "the truth sometimes in most people hands, or "the truth sometimes in a few hands", all because not eternally absolutely established, so not the truth. Thus, they are all by science of science named 'prejudice' -- philosophy of prejudice.

So philosophy 'prejudice' by science of science is defined as: those can also be established on the logic, but not eternal absolute established effective logic proposition, is called 'prejudice' -- philosophy of prejudice.

It is not difficult to find that, in the philosophy of human existing, most of the comments belong to this prejudice, all because of is not eternal absolute established.

Also because of this, so throughout history, each school philosophy of global stand in great numbers, each have each of 'the truth'. For example: 'God the truth, 'Pope the truth, The 'islamic the truth, 'royal-nobility the truth, 'Mikado the truth, 'Marx the truth, 'Buddhism the truth' and so on.

Then, following the creation of the grand unified philosophy -- "philosophy of the truth", human beings should put away hatchet that is put away philosophy prejudice, step by step towards the grand unification of the truth, i.e. the eternal absolute truth the time is up. That is to say, the philosophical grand revolution era is coming.

9) Three parts of philosophy

The truth of philosophy research conclusion, all human philosophy, there can only be, three big part: the truth, the falsehood and the prejudice.

10) "Philosophy of the truth" test Marx theory

"Philosophy of the truth" test all Marx theory:

First, there is no the truth

Second, in addition to the lie and fallacy

Third, all are the prejudices -- philosophy prejudices.

•One of the lies and fallacies

for example, "practice is the sole criterion for testing the truth", is one of the lies and fallacy of Marx's theory.

The reason is very simple, though humans has been practice for thousands of years, but so far still failed to through practice test to get the truth, one the truth, worthy of the name the truth!

Some people refuse to obey? Mules or horses, you came out to a walk: would you please illustrate, you or the people or the human, are through what kind of practice test, get what the truth? If you cannot illustrate, would you please in situ get down. don't pretend to understand! So "practice is the sole criterion for testing the truth" is Marx's theory of one of extremely big lies and fallacy.

The new science of science research conclusion, practice at all doesn't have testing the truth of the social function. The practice of social function is merely touch stone across the river: if touch a stone and across the river, but without stone don't cross the river, nothing more.

Sadly, even to this day, still have a lot of people: stubbornly insist "practice is the sole criterion for testing the truth".

They thought that, many times people encounter problems are needed to determine how to "actions" by the practice.

For example, people want to know the taste of pears, must personally 'taste', that is, the "practice test".

This kind of person of the mistake was, do not know, "personally have a taste know pear taste", this is not 'the truth'. Notice, 'the truth' is needed to use accurate definition to describe and is the only absolute eternal

expression, can be the truth. at least as many chemical way can to test also pear taste, be omitted.

All so for instance, some people say that, there is a key, can or not you open this lock before our eyes, you must have a try, can to know. This is called "a key open a lock", a practice test.

But this kind of people dose not understands, "a key open a lock" also is not the truth. By the same token, "the truth" must be established a kind of absolute eternal only tion, can to be the truth. The logic is very simple: some time one key can open many locks and there are many keys to open a lock. So "a key open a lock" is not the truth.

Therefore, "if you want to know the pear taste must personally have a taste" and "a key open a lock", two kinds of views, belong to guide people to practice social narrow empiricism -- "touch stone across the river", rather than the truth.

So, "practice is the sole criterion for testing truth" is extremely big lies and fallacy, must discard.

Replace that is, only the science of science of theory has the inspectability, can to construct, find, and checkout the truth, including the scientific truth. It's called: the science of science of theory can structure and testing the truth -- this is the only criterion for testing the truth -- useless through practice inspection link prior testing truth -- useless to surface inspection corrupt official corruption in advance!

Comments: here the so-called "structure" (the truth) refers to that, it is the language and logical organization.

The reason is very simple, all the truth, and must be a complete language sentence, and is a sole expressed, absolute eternal objective established, effective logical language sentence, can to be the truth. So, also don't have any in the world of practice and experiment, to construct such a language sentence. Also so so, "the truth" must be from science of science of theory to construct, and test. This is called science of science of theory structure and testing the truth, and is the sole criterion for testing the truth.

So you have to conclude: "practice is the sole criterion for testing the truth", it is extremely big lies and fallacy.

As a result, the science of science suggested, all his friends must have a brain teasers, from the "practice is the sole criterion for testing truth", wake up.

•The second lies fallacy

New science of science research suggests, dialectics is the method of sophistry, the essence of dialectics is the reactionary theory against science and the truth, as above. This is Marx's theory of the second extremely big lies and fallacy.

•Theoretical prejudice

In addition, such as, "get up, suffer hunger and cold slave, we want to do the world master!", this is a typical philosophy of prejudice.

The reason is simple, do not get up, the slaves would freeze to death to starve. Get up, rebels seized power, do the host, have the reason. But the landlord and capitalists of the advanced productive forces, and all were down! The inevitable result is the collective of poverty. Later, this kind of socialism has to reform and opening up, in succession, some restructuring, some disintegrating.

So, Marx's all comments, although logically can be established, but not absolute eternal founded, therefore are all belong to "prejudice" -- philosophy of prejudice.

11) In real life philosophy and the truth

Please see a philosophical proposition in real life: "old brother is big, little brother small". Obviously, this is also an eternal absolute established effective logical proposition: therefore, it is the true in real life. According to sorting this is philosophy article 6 the truth.

No! "Brother head is smaller than younger brother" -- one objection to say.

Oh, if the whole, this truth should be: "the age of the elder brother is always greater than the age of the little brother".

This shows that, science and philosophy of language, unless there is no ambiguity, are allowed to use ellipsis statement.

So, the "old brother is big, little brother small" is the truth in real life, eternal absolute the truth.

That is to say, philosophy and the truth is not far and nor mysterious, is just around the corner. Reality is, the truth is everywhere running, see you looking for or not.

It is sad, due to the misleading of dialectics, up to this day, all human beings are not able to find the truth, a truth, be worthy of the name the truth. It is clear that dialectics is fundamentally wrong, need a thorough overthrow.

12) The truth and philosophy in the social life

Just like real life, social life is also so, the truth is

everywhere running, and see you looking for or not. Please look at social life proposition, "politics must be honestly obey and service in science, and shall not be any mistake".

Ha ha, almost all the people saw this proposition, feel dizzy heavy in the brain. hardly imagine, this is also an eternal absolute established effective logical philosophical proposition, thus eternal absolute the truth. According to the sort, this is the truth of philosophy of article 7.

The reason is very simple: obey science once somewhat mistake, 'politics' immediately becomes the 'rule'. A ruler primary concern is the public's unquestioning obedience, regardless of is scientific or not. But politics must and can only, first, pay attention to science. 'Politics and 'rule', apparently, are completely different philosophical concepts, should not be confused.

Sadly, people are usually confused, let 'Politics and 'the rule' in a pan fried. Dialectics is still deliberately confused: "politics is the rule, "rule is also politics". So is blunder, unusual wrong.

It's not hard to find, the reason that, people so be brain swelling don't wake, because of the existing language itself logic to a vicious cycle, the world did not have the truth.

So, the human world is a disaster and abyss of misery.

Disaster, sin! Amen--

The endless sea of tribulations, just repent and salvation is at hand!

Where is the shore? -- Someone asked.

The other shore just is in the "Science Grand Dictionary"!

3.4.7 The scientific truth

Science also is the truth, because all scientific expression must be that effective logical propositions, which is eternal absolute and only established.

For example, physics proposition: "in, standard state, the water starts to freeze at zero centigrade". regardless of time and place, or standpoint, angle, view, the proposition is the eternal absolute only constant. Therefore, it is the physical sciences, physical the truth, eternal absolute the truth. According to sort this is the truth of the article 8.

By parity of reasoning, all the other proposition of the true science and so on, also is the scientific truth. It should be pointed out that, all of the language and words

in all science, only after the specification defines through "Grand Science Dictionary" just may become a timeless absolute the truth.

Without the specification defines of language and words through "Grand Science Dictionary", are still belong to the category of pseudoscience. So, all kinds of science need science of science unified standardized management, just can become a real science, the truth, scientific the truth.

So, absolute eternal established effective philosophical proposition logic is the truth, and both in social science and natural science all are established.

3.4.8 Criticize theory of relativity

1) Criticize philosophy theory of relativity

According to the above, science and the truth all had the four basic attributes: immutability, absoluteness, objectivity and supra - class nature.

It is clear that dialectics complete failure!

So, dialectics is neither science, nor the universe / world universal (law) the truth, therefore can only be prejudices and fallacies. the so-called prejudice lie in, dialectics is effective only for that, which is the phenomenon of the surface of the material world with the naked eye visible to people. But, for the intrinsic nature of the law of nature in the universe / world, that is people not visible with the naked eye, i.e. the science and the truth, is invalid.

The reason is very simple, in the universe / world, all science and the truth, all without exception is eternal and absolute, is neither relative, nor dialectical. So, the key of dialectics, lie in, using superficial specious facts and logic, denies the eternal absolute objective established science and the truth. In this sense, dialectics is complete reactionary epistemology, need a thorough criticism!

Philosophy theory of relativity derived by dialectics is also wrong, need to completely overthrow together.

Philosophical relativity said, the truth is relative, not absolute; there is only relative the truth in the world, there is no absolute the truth; the sum total of innumerable relative truths is the absolute truth.

Obviously, the philosophy theory of relativity completely is wrong, need a thorough criticism!

So can make the final definition of dialectics: The so-called dialectics that is, to use the surface phenomena of nature things, visible by people naked eye, and use specious logic, to deny the inner essence rule -- Eternal

invariable science and absolute truth. This is not only the definition, at the same time is a timeless absolute the truth. According to sorting this is philosophy of article 9 the truth.

So, the modern revolution in science and philosophy is coming!

Also it is not difficult to find, the philosophical theory of relativity and physical relativity are birds of a feather, act in collusion with each other, like drawn to like, to do evil on the world, all needs to be thoroughly overthrown!

2) Criticize the physical theory of relativity

•Physical relativity and dialectics

Physical relativity said: the universe / world is relative, not absolute; the space is relative, not absolute; time is relative, not absolute; matter is relative, not absolute; mass is relative, not absolute; length is relative, not absolute; basic principle of physics is relative, not absolute, and so on.

According to the scientific four cardinal principles and four basic characteristics as you see, the physical theory of relativity is the reprint of the philosophical theory of relativity and dialectics, completely wrong.

"The philosophy of the truth" conclusion: although the relative things can exist in the universe, for example, the relative time and relative space, relative speed and so on but you can't have relativity theory! The reason is very simple, all relative things are man-made subjective conventions, for example, "Beijing time, "Tokyo time, "up and down, "left or right, "fast and slow, "black and white", and so on, all are people's subjective agreed. However, science of science research conclusion, can't because the convention of the relative time, then to negative absolute time.

Deny absolute time and absolute space, this is the common fault of the inevitable kingdom people. Since the relative thing is people's subjective conventions, so all carrying with a man's subjective elements, so the theory of relativity is man's subjective will's product. So the theory of relativity is necessarily pseudoscience.

•Galileo relativity criticism

One of the typical representative of physical relativity is Galileo. If Einstein is the relativity of chief criminal, you say that Galileo is the theory of relativity of chief culprit.

Galileo relativity constant principle of physics said: the basic principle of physics is all relative, not absolute;

inertial system in the universe is equal rights, no superior inertial coordinate system.

And Galileo used a broken boat, by hook or by crook, let people believe that: no superior inertial coordinate system in the universe.

Little imagine, in addition to Newton's inertia force in the universe all physics problems, have corresponding superior inertial coordinate system. For example: study air fan motion in the car, the car is superior to the inertial coordinate system; study the movement of the train, the roadbed is superior inertial coordinate system; study the earth movement, the sun is the superior inertial coordinate system, and so on.

This suggests that in the universe, in addition to Newton's inertia force, for all the problems, the inertial system are not equal rights. there are always superior to coordinate system. So, Galileo physical relativity principle of constant was untenable at all, completely wrong.

•The critique of Einstein's special theory of relativity

Obviously smarter than Galileo, Einstein spent two closed elevator doing the experiment, used to support the theory of relativity. The reason is very simple, in a closed elevator, people cannot see the external reference substance with the naked eye to judge the motion state of this system. A closed elevator is used to prove that inertial system is equal rights: another closed elevator is used to indicate the light in the accelerated system in a closed elevator trajectory is curved, used to support the general theory of relativity.

But the following two classic physics experiments, fully capable of completely overthrow of Einstein's special / general theory of relativity.

Albert Einstein's special theory of relativity principle said: in a closed elevator, people can't use classical physics experiments to determine the motion state of closed the elevator.

Experiment 1: with velocity V movement of the two closed elevator, respectively has two spheres with the same charge q and two mass for m sphere of the experiment. See figure 1:

Figure 1 closed elevator experiment:

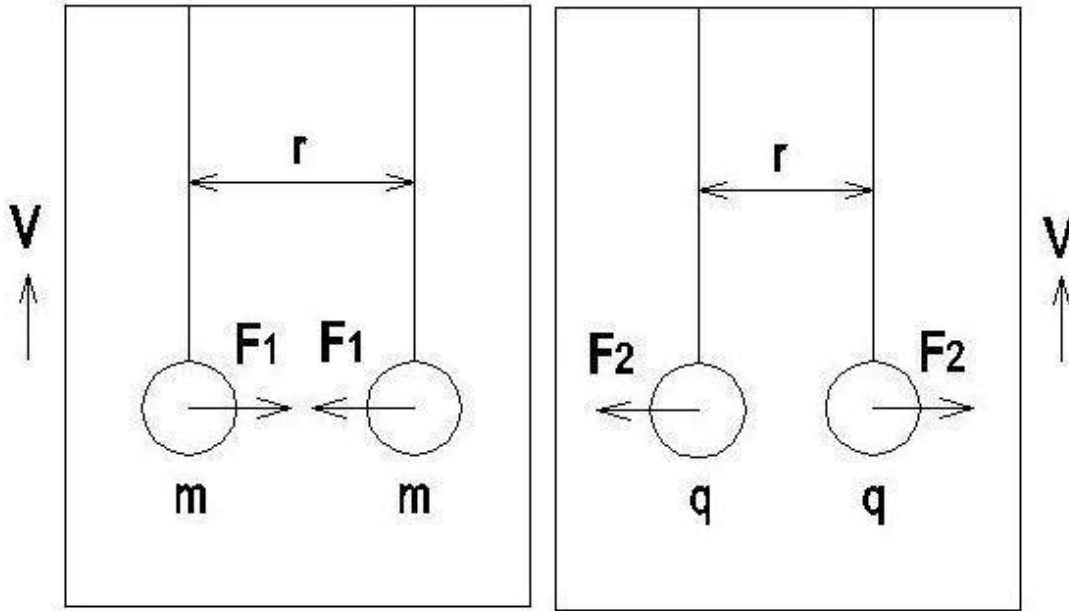

Figure 1 Closed elevator experiment

Obviously, according to the moving charge lorentz force expression, there is F_2 (cgs unit system):

$$F_2 = (q^2/r^2)(1 - V^2/c^2)$$

Therefore, according to the F_2 can not only determine closed the elevator movement status, and can accurately determine the elevator speed V .

Also, apparently, according to the theory of relativity mass-speed relationship, can be measured F_1 :

$$F_1 = (Gm^2/r^2) / (1 - V^2/c^2)$$

Thus, according to the F_1 can also accurately determine the closed elevator motion state and its velocity V .

If you can't detect F_1 change with velocity V , more showed that the special theory of relativity is wrong, because the mass-speed relationship was not at all established.

So the conclusion: Einstein's special theory of relativity expressed by the closed elevator, constant principle of physics, is not established at all. So, the special theory of relativity is wrong at all.

•The critique of Einstein's general theory of relativity
Experiment 2: see figure 2, used to criticize the general theory of relativity.

Figure 2, relative acceleration:

Figure 2

Figure 2 shows, a ball shell exploded into two pieces A and B, respectively get the opposite acceleration a, then the relative acceleration of A and B is 2a. However, there is no corresponding to the 2 a of acceleration force F:

$$F = 2ma$$

And, the real force between A and B are only f:

$$F = ma$$

So the conclusion that the relative acceleration cannot be equivalent to a gravitational field. However, Einstein's general theory of relativity principle said: 'acceleration' equivalent a gravitational field.

Please note: the 'acceleration' is fuzzy acceleration. In the universe, only true 'the relative acceleration and 'absolute acceleration, no 'fuzzy acceleration'. Then, theory of relativity, theory of relativity, can only use 'relative acceleration', can't use 'absolute acceleration'. So experiment 2, however, as shown to the 'relative acceleration' 2a, won't get any equivalent gravitational field.

So you have the conclusion, because of the relative acceleration not equivalent gravitational field, so, Einstein's general theory of relativity principle does not set up, Need a thorough overthrow. Also visible, Einstein's general theory of relativity principle fundamentally can't use language to express accurate and reasonable! Some people refuse to obey? Please give it a try!

So, Einstein special / general theory of relativity is specious, pseudoscience. And GSI international journal articles "Grand Unified Physics"[4], i.e. the appendix 2 has eliminated all the Einstein's theory out of the physical sciences.

The entire above conclusion, Physics theory of relativity, including Galileo's theory of relativity, Einstein's theory of relativity, are completely wrong. Physics must be the eternal, absolute, the truth and science.

Also apparently, science of science in the 20th century have no this kind of inspection ability, thus science of science in the 20th century is completely ineffective.

3) Criticize scientific theory of relativity

Scientific theory of relativity say, science is unceasing developing and changing, no eternal invariable science.

However, the new science of science research conclusion, science can only be discovered, not can be developed; once be founded, is eternal invariant; once

be developed, there will always be ambiguity -- violation of science!

'Invariability' is also an important symbol of science differ from technology. For example, the computing technology, from the abacus to the computer, continuous development, therefore, the computer can only is technology, can't say 'computer science'. So, the scientific theory of relativity is completely wrong. Physical theory of relativity, philosophy theory of relativity, scientific theory of relativity, three theory of relativity, birds of a feather, act in collusion with each other, like drawn to like, to do evil on the man's world, become into three big mountains pressure on the human head.

With creation of "philosophy of the truth", the time to overthrow the three big mountains is coming!

Comments: science can be used "progress", not with "development", to describe. This reason very simple, once the science to be developed, and certain appears ambiguity -- violation of science! Be omitted.

3.5 The scientific revolution

The new science of science conclusion:

Modern scientific the world revolution is coming, scholars have to brave face; ordinary people and politics also is no exception -- have to brave face!

The modern scientific philosophy revolution is coming: Mr philosophy should be brave face!

The modern scientific Cultural Revolution is coming, all mankind want brave face up to!

Three revolutions want to catch together, three hands all want hard!

Science Datong program

4.1 Program preface

It goes without saying, 'science and 'datong' is already that topics, for which the people, experts, scholars, fist, of the ears are frazzled.

But, as long as the people to be patient, grab attention will be found, here the "scientific datong program", you will get three new enlightenments: eyes newly born; soul newly born; life newly born.

"Scientific datong program" here is not people already familiar with, and often heard, a vicious circle of language and words -- almost wild tales.

Here the 'science', and all of the language words, with you acquainted the vicious circle of language words are very different.

Here of 'science' and all languages words are unified specification defines by science.

Here, all language words, consequently, logic itself is no longer a vicious cycle.

By contrast, your familiar language and words, as well as the global language words in countries around the world, no scientifically standardized definitions, thus language words itself logic is common vicious circle: "black is white, "good is bad, "revolution is counter - revolution, "corruption is clean, "science is also pseudoscience, "relative is absolute, "the truth is fallacy", such as logic generally true in the world. So this world, there is no objective the truth. Always under any circumstances, as long as you have a mouth, and to be two layers of skin, how to say how all right, strength is the commander in chief, fist the lie is the truth.

Because the language and words, in the science of science have been scientific unified specification defined, logic itself is no longer a vicious cycle, so here are all the objective truth, eternal absolute the truth!

From now on, politics is no longer a commander in chief, the fist lies are no longer the truth!

From now on, if you are right you will go through the world, if you are unreasonable, you're move an inch!

From now on, the eight immortals crossing the sea -- all show!

Here the "science datong program", includes the following three aspects of the content of the program:

The first aspect: the language words of world Datong science program

The second aspect: the scientific academic of world datong science program

The third aspect: the human society of world datong science program

This is the world theory of datong -- science datong -- science-idea country -- the Freedom Kingdom -- the only home to return to human society!

"Science datong" theory, is not only real, concrete, actual, and should be, people can now, practically operate action 'platform'.

But, don't want to, not willing to, practically operate "science datong program", may be there are only two people in the world:

A kind of person is all sorts of the vested interests of the society; the other kinds of people, is the progeny of close relative marriages -- stupid.

So, it is necessary to 21st century science of science to specify and show the maneuverability of the "scientific

datong program". Science of science hopes friends, people, to be able to like it.

The reason is very simple, new science of science with inspectability:

--The theory testing the truth

--This is the only criterion for testing the truth

--Useless through practice inspection link prior testing the truth

--Useless to surface in advance inspect corrupt official corruption

So, the science of science is to test you : the stepping - stone to success of true or false public servants, bang bang; the touchstone for public or private; revolution counter - revolutionary natural watershed; sill is the monster - revealing mirror and never fades -- all kinds of the monsters and demons is immediately showed oneself in one's true colours!

However, the people, Humans, they has been very familiar with the vicious cycle language words, see so strong in advance test the truth, the eternal absolute truth, science of science and its rhetoric, most people will be stunned, lose one's presence of mind.

Don't believe it?

Now will give you in advance for testing the truth once:

Whatever, don't accept, ignoring, disregard for, against, conflict "science datong platform" of officials, destined are all corrupt official corruption!

Whatever, don't accept, ignoring, disregard for, against, conflict, "science datong platform" of scholars, destined are all the monsters and demons!

Believe it or not, it's up to you.

Of course, you can wait for practice tests.

However, your practice test, in science of science, here, is only the back of horse deflated, academic statement called the monday morning quarterback.

4.2 Datong thought of the history symphony

Western datong thought symphony

1) Western datong symphony prelude -- 'The Republic' fantasia

BC, the scholar in the ancient Greek philosophy to fanfare the overture of world datong first symphony, it is the 'The Republic'. Plato's theory consider, the existing 'politics and 'ruler' are bad. His theory has designed a "the true, the good and the beautiful" the unity of polity, i.e. the impartial The Republic. He thinks that a philosopher is the most noble, most knowledgeable people, under the rule of the sage regime is be the best regime in the world. Therefore, only by establishing the philosopher as the king of the

country is the most ideal state -- a model country of the sky, the ideal state.

Obviously, due to historical limitations, and the lack of science / philosophy theories, Plato's "The Republic" theory at best be classified as a vision for the future state about "the true, the good and the beautiful" of a longing.

Focused on Plato's theory of embarrassment lie in, don't really know what is philosophy, what is science? So Plato exclamation of doubt: why politicians not a philosopher or a scientist; why can't scientists and philosophers became a politician?!

This suggests that Plato the first don't understand the philosophy, the second do not understand science, the third, don't understand politics.

Science of science research conclusion, the primary criterion understands and don't understand science / philosophy / politics is that, can give science / philosophy / politics make an accurate definition. The causes and the facts are very simple: the 'representative' level's 'the king' of modern society, knowledge level has reached or far more than 'philosopher', but, the 'The Republic' -- the true, the good and the beautiful regime and no implementation.

So it's not hard to conclusion, Plato's 'The Republic' theory, only is a longing the true, the good and the beautiful 'fantasia'.

2) The western Datong world of the first created song -- 'Utopia' -- 'fantasy socialism' intro
Utopian socialism primary stage intro is 'utopia'. From 16 century Thomas more's book 'utopia' began, until the 17th century, Saint-simon, Owen, Fourier and others created the theory of 'utopian socialism'.

Utopian socialists put forward 'public ownership' and "everyone is working, to each according to his need" and so on socialist basic principles. And discusses: the human - oriented, harmonious coexistence, freedom of marriage, euthanasia, respect for women's rights, religious diversity, etc with modern life closely related problems. He created the word 'utopia', created the theory of utopian socialism: its ideology has become a modern socialist ideological trend of one of the sources.

But 'utopia' to the imagine of socialism, is only a rough and simple outline. Therefore, this is human fantasy socialism first symphony -- intro.

3) Western datong world of second symphony -- "utopian socialism" development symphony
In the 18th century, the utopian socialism came to the stage of development -- Spartan communist regime. Represented by Morely, Baboeuf Utopian socialist developed the theory of "Utopian socialism". Formed: a preliminary class point of view, an absolute equalitarianism, penance humble, asceticism, Spartan communist state political structure theory. This is the second western utopian socialist movement -- Spartan communist symphony.

4) Western datong world of the third symphony -- 'communist datong' -- Utopian socialism top symphony
In the 19th century Utopian socialism development at a period of great prosperity stage, this is the marxist theory of 'communist datong'

The new science of science study shows that, determined by the objectivity, the science / the truth / philosophy, don't include and to exclude anyone's subjective will. Anyone's subjective will, no matter how splendor thought, doctrine how glorious, neither science nor the truth, more is not a philosophy. So 'scientific socialism' in itself is not science, thus a pseudoscience. New science of science clear conclusion: in science, there is no socialism: socialism is sheer man's subjective will, no matter how shine with great splendor, forever is not science! Combined with the Marxist communist Datong is established on the basis of "Utopian socialism" in France, thus became a Utopian socialism theory of the peak. This is the west Datong world third symphony -- communist Datong -- the Utopian socialism of the peak.

4.2.2 The Oriental fantasy world Datong symphony

1) East fantasy world Datong symphony prelude
As early as in 551 - 479 BC, in the end of the spring and autumn period, the thinker and educator in China, the founder of Confucian school, Confucius created a prelude to eastern thought for world datong. In the book of "Rites LiYun" Confucius said in the article: road trip, the public all over the world, is the Datong.
This is the eastern world datong prelude song. This kind of prelude, than the ancient Greek scholar Plato (before 427 - before 347) 'The Republic' created by more than one hundred years earlier! Visible datong civilization of the east, than in the west has a long history!

2)The eastern world Datong first symphony
China at the end of the qing dynasty, the taiping heavenly kingdom movement of hong xiuquan created 'agricultural socialism', implements the public ownership. This is the Oriental fantasy world Datong first symphony.

3)Oriental Datong world's the second symphony -- "Datong book"

Kang youwei leads shock of Chinese and foreign Hundred Days' Reform movement and written the "datong book", this is the east bourgeois reformists "datong socialism" -- Oriental fantasy world Datong second symphony.

According to kang youwei himself, began as early as 1884 "deduce datong doctrine". In 1885 was finalized system of Datong, called "human axiom". live seclusion in India in 1902, at last publication, "datong book" titled, it is one of the main representative of kang youwei.

The basic content of "datong book" can be summarized as follows:

No country, set the total government around the world, divided into several areas.

② Total government and district government are all elected by the people.

③ No family, men and women living together shall not be more than a year,.due to substitution

④ Women have pregnant into the foetus education institute and the children into the nursery school

⑤ Children by age into the enlightenment and schools at all levels.

⑥ As an adult is appointed by the government industrial and agricultural production and other work.

⑦ Patients into general hospital and old age into the nursing home.

⑧ Prenatal education, infant care, enlightenment, for illness, nursing homes, etc., is the highest equipment of district.

⑨ Adult men and women, all need in the service of the above a few years, as well as military service.

⑩ To establish the public dormitory, canteen, there are all differences.

(11) Police dereliction of duty is the most severe punishment.

(12) Academic have new inventor and in above five yard has special merits and accomplishments, have amply rewarded.

(13) Death is cremated, the crematorium is next fertilizer factory.

Oriental Datong world the third symphony

Sun yat-sen bourgeois revolutionary "People's Livelihood" society fantasy, created "For all over the world" symphony of datong world -- oriental fantasy world datong third symphony.

When to friend Zhu Zhonghua inscription "for all over the world" Sun yat-sen said, "For all over the world, is the world famous grand duke, to realize for all over the world, can reach the world Datong".

New science of science conclusion:

New science of science has the inspectability, theory testing the truth: this is the only criterion for testing the truth.

Checked by science of science, the thoughts all above, belong to a person's subjective desire, therefore, all belong to "Utopian socialism -- "fantasy world Datong".

Now that is Utopian, also without exception, are all impossible.

But in this paper, the "science datong", not only is practical, but is completely can be achieved.

So the science of science conclusion:

Implement science datong, 10 years too long, seize every minute!

As long as there is sense of responsibility of scholars' first enlightenment, where there is a will there is a way.

Work hard, friends! Datong world in waved to you.

The World Datong Operational Procedures

5.1 Unify world

Science of science study shows that, human to realize the world Datong, essential process is unify various countries in the world.

It goes without saying that the fact and the historical experience show that unify various countries in the world than touch the sky is also difficult! The first is that humans so far, still not qualified to a unified theory of the world. Human existing Datong theory, including communist Datong theory, are all unrealistic fantasy, with unify world is far from the reality! So a lot of people can't believe, to achieve Datong in the world.

5.2 Unify world of possible logic

Historically to unify world, there are two kinds of logic:

It goes without saying: one is the force uniform, the other one is cultural unity.

5.2.1 Say first unified by force

The so-called unify by force that is use of force, or military means, to unify the world. For example the Spartan Utopian socialist, is trying to use military means to unify the world.

Although the world is amidst the winds of change, As human society advances, dominant countries or strongman, the possibility of using force unification world, is becoming more and more small. To say the least, even with an iron fist country or strongman, the use of force conquered the world, however, he has to dictatorship. It goes without saying, won't be long any authoritarian system.

5.2.2 After the said with cultural unity

The visible, use the force unified world way doesn't work. So, in fact, unified the world there is only one way, this is using the culture method to unify the world.

The so called culture unification that is using the theory of culture or way unification the world.

Science of science research has shown that the essence of using cultural unity the world is adopt scientific political culture, to unify the world.

But, what is the global unified "scientific political culture"?

This would require the scholars study hard!

Humans entered the 21st century, due to the "new progress in science of science" (New Progress in Science of Sciences) [3] and the creation of "philosophy of the truth", human society has entered the world Datong operational phase. Operability cosmopolitanism, the first step is to "unify global politics, and "unified global politics" has now been referred to the new science of science of the agenda.

"Unified politics" this is unimaginable before the 20th century, more can't do. It is because of the new progress in science of science and the creation of "philosophy of the truth, "unified global politics" problem will become very easy. The reason is very simple, science the first social function just lie in to unify global politics! -- implement global great unified politics.

What is the world's great unified politics?

Everyone, politics, religion, unconditional obey science only, not the slightest mistake, this is called global great unified politics.

5.3 Unify global language -- create global unified "datong world lingua franca"

The new science of science study shows that unified global politics of the premise condition is "unified global language and words". No global unified language and words, "global unified politics" is not possible. The reason is very simple, in the inevitable kingdom world -- so far human history, All countries in the world with its unique language and words implement the unique political route and rule. Using the unique language implement characteristic rule, is also a prominent feature of Chinese politics.

Therefore, a unified global politics world community, first condition is "unified global language". This need create a unified global "Datong world lingua franca".

So far, mankind has created hundreds of artificial language, -- "international esperanto", tried to global universal. The new science of science study also shows that, hundreds of human existing international esperanto, also can only did the unification of 'sound and 'shape', never able to achieve unification of 'meaning'. So it is impossible to be global universal. Can universal language must achieve "sound -shape-meaning" three unification at the same time.

Worthy of congratulations, new science of science has been studied and summarized a set of global unified "datong world lingua franca", not only can achieve a unified global language, and is the most concise, easy to learn, easy to remember. More it is worth noting, "datong world lingua franca" pronunciation is based on Chinese pinyin. Although datong world lingua franca use Chinese pinyin for foundation, but this does not mean "datong world lingua franca" be partial to China, and still maintains the principle of 'neutrality'. This is because the "datong world lingua franca" of the neutrality is only determined by the "datong science dictionary". Please refer to chapter 8.

5.4 Science - ideal country government and the world coalition government work and organizational structure

- 1) Everyone, politics and religion, only unconditional obey science, this is called the Freedom Kingdom -- world Datong -- science - ideal country -- the only home to human society!
- 2) Science - ideal country government and the world coalition government to set up the science palace, in the science palace, presided over work by science emperor.
- 3) Science palace to country and the world coalition government has the highest dministration authority

- 4) Science emperors in the republic country, similar to the president, the king or the chairman.
- 5) Science emperor in the world coalition government similar to the UN executive chairman, higher than that of executive chairman.
- 6) Science emperor in the republic government has the right to appoint the premier of the state council one person.
- 7) Science emperor in the world coalition government, has the right to appoint the UN secretary general one person.
- 8) The premier of the state council to call person selected for and constitutes the state council, preside over daily work of the state council, the work is mainly responsible for science emperor.
- 9) Coalition government secretary-general to call person selected for and composition of the coalition government secretariat, preside over the daily work of the world coalition government. The work is mainly responsible for world coalition government and science emperor.
- 10) The ideal country government and the world coalition government, elected for a term are four to five years.
- 11) Each term ideal country premier of the state council in their term final year of the second half of the year hosts a national election, all citizens to vote the next national science one emperor.
- 12) Ideal country science emperor is responsible for to form the science palace, and ideal country of all planning and management work.
- 13) Each period of the world coalition government secretary-general, presided over a global universal suffrage in the second half of final year in the term, elects world science emperor.
- 14) World coalition government science emperor is in charge of the work of global science palace, and planning and management global science progress.
- 15) Premier of the state council of the ideal country after chaired the national election, held a government work report, after report formally stepped down automatically.
- 16) After leading the global universal suffrage, the coalition government secretary - general for global to do a world coalition government work report, after report formally stepped down automatically.
- 17) The new science emperor of ideal country, after the prime minister left office, to take over the all work of the ideal country government, and in 1 to 2 months to appoints a new prime minister of the state council,

new prime minister convened and forms a new state council.

18) The new world coalition government science emperor, after out of office of secretary general, take over the world coalition government of all work, and in 1 to 2 months, appoints one new secretary-general of world coalition government. The new secretary general is responsible for the formation of new secretariat.

19) Science emperor can ensure application of science and technology -- the first productivity: organize human society of the highest productivity. To implement and ensure that all citizens the need of the supply material for daily and cultural life, and be able to satisfy each takes what his need and be to hand.

20) The premier of the state council and the world coalition government secretary general, have not the right to be elected as the next government scientific emperor.

21) The new science emperor have the right to the last emperor accountability and investigated, but only according to the existing law and according to established procedures, can not according to the new laws and new procedures.

22) If laws and procedures that there is the trouble problem, you can, should, advancing with the times.

23) Such a cycle, constitutes the ideal country and the world coalition government of Datong world of all management work and its function.

6. Science Basic Principle

The science basic theory contains [principle], [axiom], [theorem], [law], [inference], [rule] and so on concepts. These concepts are need to have a clear specification and definition.

6.1 About the definition of 'definition'

So far, pseudoscience cause, not only people, especially in the academic circle, combined with the theory of relativity academic misleading, for scientific 'definition' had already get carried away. Many authority of experts and scholars, openly argue that science does not need to clear or strict definition.

The most typical example is the global science authoritative scholars in the 20th century, J.D. Bernal (English), in the book, "Science in History" conclusion: the science is not a can to use definition once and for all, be fixed single one. There are some other authoritative scholars in a very secluded place also advocating science do "not need to strict define".

The new science of science study shows that, 'science' needs not only accurate definition, all academic languages also need to be strictly defined, and more, all human languages also need unified specification defines. Otherwise, all scientific, academic, and philosophy, human and society, must be a mess. This is the inevitable kingdom -- human history so far.

So, the human language revolution and the scientific revolution is come already.

Then, about the definition of 'definition', new science of science, specification as below:

The definition of 'definition': Use a complete language sentence, can only use a complete language sentence, for the implication of the word / words makes out as much as possible the detailed statement, This is called the definition of the word / words. The definition also can be with comments extended.

The discussion about 'definition': The definition of any word / words, don't can use two or more language sentence to statement. Postage stamp passages more can not used to describe a word or words.

Baidu encyclopedia of China, for example, to "the Freedom Kingdom" described as defining description as follow:

The so-called "kingdom of freedom", Marx believed that the Freedom Kingdom according to the nature of things, it exists in the real material production in the field of the other shore, but is not to say that the other shore is the realm of freedom in the field of material production, only when the development of human themselves ability as a purpose itself is the real freedom kingdom. Material production activities of the opposition between here and other side, is essentially the opposition between free time and work time.

The realization of the free kingdom, is the material production activities of 'here and 'the other' confrontation sublation, the discard of the conflict between free time and work time. Its direct expression is the generalization of labour. The so-called Free Kingdom, refers to the means of production and activity areas, people survival activities in this area lies in the purpose of their own, human development is the purpose, labor and all other human activities are in order to realize the subject's own internal needs. Man is both purpose and means: activity itself embodies the purpose and means, people's value realization and the unity of the creative process.

Clearly here, baidu encyclopedia adopted the postage stamp words of six language sentences: to "the Freedom Kingdom" does defining description. This

approach does not conform to the science, in the future should be completely avoided.

6.2 Science basic principles

[Principle]: the basic theory of containing the scientific methodology property, called science basic [principle].

[Science basic principle 1]: for any real science, its content must conform to the science and the four cardinal principles: the "clear concept, "accurate definition "reasonable logic and "strict rules".

[Science basic principle 2] -- [measurement of quasi of principle]:

[Measurement of quasi of principle]: the universe / world is knowable, measurable, and are measurement of quasi; the measured accurate of the measurement, ultimately depends on the accuracy of the Planck constant h ; only exist uncertainty of scholars in the world, there is no "uncertainty principle".

Editor's note: obviously, the "uncertainty principle" of quantum mechanics is a completely mistake, and seriously misleading human science. need a thorough corrective.

6.3 the overall universe / world scientific axiom

The overall universe / world contains objective material world and the subjective spirit of the universe / world; objective material of the universe / world is innate, the subjective spirit of the universe / world is acquired, congenital physical universe / world is the eternal, absolute, objective existence; this existence do not rely on anyone then objective existence, also don't rely on anyone's subjective spirit will and to transfer.

[Overall universe / world existence axiom inference 1]:

Substance of the universe / world of the surface is forever development and changing, the development and changes are visible to the people naked eye; but in this development and changing, there is always people not visible to the naked eye, eternal constant, the absolute inner essence rule, this rule is the science and the truth.

[overall universe / world existing axiom corollary 2]:

The universe / world exists the acquired spirit and soul, contain 'ideas, 'ism and 'doctrine, 'faith, 'outside the soul' and so on, all are man's subjective will, no matter 'thought' is how much glorious, 'doctrine' how splendid, 'faith' how pious, 'thinking and consciousness' how deep and euphemism, also needless you are how 'true, good, beauty' or 'false,

evil, ugly', all neither science nor the truth less philosophy.

New science of science comments:

First, obviously [overall universe / world existence axiom] not only applies to all

natural sciences, also applies to social and the humanities, more suitable for philosophy.

The second, so from now on, any theory of human science, also must have a "view of time and space" support. Otherwise all pseudosciences, the science of science resolutely ban them.

Third, also obviously, [overall universe / world existence axioms] fundamentally repudiates the theory of relativity, all of the theory of relativity, including physical theory of relativity, philosophical theory of relativity and science theory of relativity.

The new science of science research conclusion: in the universe / world, there is not only a large number objective existence of eternal absolute things, for example, material and time and space, the science and the truth. There are a lot of relativity of things, for example, "relative space and "relative time "relative speed "relative size, "relative black and white", and so on.

But the universe / world, any the relativity of things, always cannot be the science and the truth, in the past, now, so in the future. In the universe / world, only those who, with unified specification language expression of the rule of absolute eternal objective set up, and don't rely on anyone subjective will exist: can be the science and the truth.

It is not hard to see in the universe / world: all of the theory of relativity from now on stretch out legs glare finished!

The reason is very simple, all of the theory of relativity without exception all reflect man's subjective will -- the theory of relativity.

And also, the important mission of science exactly lie in, for humans find / search for, in the universe / world, eternal, absolute, objective, existence and eternal, absolute constant, objective law and the truth. So in that sense, all the theory of relativity are anti-science reaction theory! The science of science resolutely bans them.

And in the universe, although there is also some relative things, but there are people's subjective prescribed ingredients, such as "Tokyo time" and "Beijing time", etc, they are all agreed by people; relative space is also the people' subjective agreed, for example I centered, "up and down, left and right or so before and after" are all subjective agreed by people;

again for instance, the speed of the train with the speed of the crawler animals, between them, there are the "relative speed" and also relative "fast and slow" problem, although there is also an objective existence, but the relatively "fast and slow" has people' subjective conventions.

You agreed to the train speed, for example, 'fast', so the speed of animal crawler is 'slow' and so on.

So "theory of relativity" -- everything are all relative, completely thorough is the theory of man's subjective will.

And all the theory of relativity, including physical theory of relativity, the philosophy theory of relativity, the scientific theory of relativity, in particular, Einstein's theory of relativity, all are utter misery human soul, to do evil of human society, against humanity of the reactionary theory!

Disaster, sin! Amen --

Even so, there will be some relativists, including physical relativity with the philosophy relativists, righteous extremely arrogant, still insist on the universe / world is the existence of the theory of relativity, not the absolute objective existence. But you know, you must create [the universe / world relativity exists axiom], to just go.

Otherwise, your righteous extremely arrogant belongs to a rampage. Despicable is that, you never can not only in the past, and now and in the future, you didn't ability, to create the "the relativity existence axiom".

So the science of science resolute and decisive bans all of the theory of relativity!

Someone will ask challenged questions: how much is the train absolute speed in the universe?

Obviously this problem in general physics, with the theory of relativity, there is no solution. This is a "higher physics" content and problem, and for the problem, relativity cannot answer at all, so which problems belong to 250 scholars unreasonable questions.

So you have to clamp down on the theory of relativity!

6.4 About [Axiom] and [Theorem]

Before science academic no [Axiom] and [Theorem] clear definition, now, need new science of science gives [Axiom] and [Theorem] both of accurate definition:

[Axiom]: people through the simple and intuitive experience test, can establish the eternal absolute effective logical basic academic proposition, this kind of logical proposition is the [Axiom].

The natural attribute of [Axiom]: all [Axiom], neither by logical deduction to prove that also can't use logical deduction to falsify.

[Theorem]: through the logic deduction proved strictly, can be eternal absolute objective established the academic proposition, called [Theorem].

[Axiom] and [Theorem] common characteristics:

[Axiom] and [Theorem] all are the eternal absolute established science and the truth.

[Axiom] and [Theorem] different characteristics:

[Axiom] only can use the intuitive experience inspection, neither can be logical proof, nor may be logical falsified

[Theorem] must have the strictly logical deduction to prove.

6.5 About [Law]

[Law] : the larger category of effective logic of the proposition expression, is called the law.

For example: [law of conservation of energy], [substance immortalization law], [law of universal gravitation], [law of universal repulsion], and so on.

[Law] and [Theorem] the differences and similarities:

[Law] and [Theorem] in common: they are the eternal absolute objectively established science (law) and the truth.

[Law] and [Theorem] differences: obviously, the application of [theorem] and [law] category size is different.

[Law] application category is a relatively large.

[Theorem] application scope is relatively small.

6.6 Basic scientific axiom of universe

With [overall universe / world existing axiom], below is the universe / world specific science axiom.

The new science of science study also shows that, the global academic is lack of basic scientific axiom theory, so far, human science is very chaotic, combined with the philosophical theory of relativity and scientific theory of relativity in academic.

high-end haunt, physical theory of relativity and quantum mechanics pseudoscience flooding, rock the boat, not only makes the human science and human society holds a disaster! To now, that time is coming, on which the new science of science set science right, turn the tide, at least, because the theory of relativity and quantum mechanics is a composition with man's subjective will.

6.6.1 Universe space existence axiom

[Universe space existence axiom]:

In the universe, 'space' is a objective existence, this existence neither depend on anyone existence, nor rely on that in the 'space' whether there is matter (body) of the existence, and objective existence; also neither according to anyone's subjective will to change / transfer, more do not rely in the 'space', the matter (body) whether be movement or change.

The universe 'space' definition: in the universe, any matter (body) possession of the place, is called cosmic space.

1) [Universe space axiom corollary 1]:

'Space' in the universe, even if all the matter be emptied, space still exists objectively; with or without matter existence, space is always objective existence.

2) [Universe space axiom corollary 2]:

'Space' in the universe exists and objectively exists. does not depend on anyone; also not according to any one's subjective will to shift and change.

3) [Universe space axiom corollary 3]:

The universe space can use Euclidean space geometry three-dimensional coordinate system to represent; but any non-european geometry at any time can't change Euclidean geometry of 3 d geometric features and attributes.

4) [Universe space axiom corollary 4]:

In the universe, the space is only 'how much, 'size, 'location' three kinds of natural attributes; never never bending properties.

5) [Universe space axiom corollary 5]:

All objects (matter) in the universe and its possession of the space between, never never happen any physical, chemical and biological interactions.

6) [Universe space axiom corollary 6]:

Matter (object) in the universe space to appear any physical, chemical or biological changes, will can't change the Euclidean three - dimensional space of natural property.

6.6.2 The universe time existing axiom

[Universe time existing axiom]:

The time in the universe is the absolute eternal objective existence.

That is, neither to depend on anyone and objective existence, nor according to anyone's subjective will and transfer; or also whether any object (matter) is

movement or change, and the time always objective existence.

'Time' definition: in the universe, time is a eternal, absolute, unidirectional uniform of the elapse, used to represent all the things happen and development of the result or process, the math / physics quantities.

1) [Universe time axiom corollary 1]:

The time in the universe, has only "long / short, "more / less, "unidirectional uniform loss", three kinds of natural property.

2) [Universe time axiom corollary 2]:

The time in the universe, can use equal scale mathematical ray to representation.

3) [Universe time axiom corollary 3]:

The time in the universe, never has 'the bend' nature attributed.

4) [Universe time axiom corollary 4]:

The time in the universe, never with any matter (object), appeared any changes in physics, chemistry, biology, exists some kind of effect; when any matter (objects) in the universe occurs any physical, chemistry, biology, changes, will not cause the universal unified absolute time of the nature property of the changes.

6.6.3 The creation of universe absolute space-time coordinate system

Science of science study shows that, almost all, no, it is all the scholars, without exception, all theory, including the theory of social science and philosophy, is actually in the default using the universe absolute coordinate system. However, the vast majority of scholars, especially the theory of relativity, but utmost trying to deny the universe absolute coordinate system. Investigate its reason, lies in that, they cannot be derived theoretically and technically also cannot find, the universe "absolute coordinate system".

Therefore, science of science, it is necessary to give correction and create the universe absolute coordinate system.

1) Universe absolute space coordinate system of the creation

Make a spaceship, in the vast universe space, with the third cosmic velocity V , to universal flight, inside the spacecraft, there are two spheres with the same sex same amount of charge q , spacing for r , r perpendicular to V . At any time there will always be Lorentz force F_2 , between two charged spheres, see the second chapter, F_2 , in figure 1.

Computer system automatically detect at any time between two charged sphere of lorentz force F_2 (cgs system):

$$F_2 = (qq / rr) (1 - VV / cc)$$

In the type, q as the sphere charge, r for sphere spacing, V for the airship speed, V perpendicular to the r , c is the speed of light. When lorentz force F_2 has a maximum value, the spacecraft releases ready beforehand "three-dimensional right-angle coordinate axis" into space. The "three-dimensional right-angle coordinate axis", is the universe absolute space coordinate system.

2) The creation of the universe absolute time coordinates system

Any a uniform mathematical ray can be used as the absolute time coordinate system of the universe.

The absolute time zero point, apply for the first year of January when New Year's day 0 0 0 second

6.7. The problem on non-euclidean geometry

Roche non-european geometrical axiom can be expressed as: through one point outside straight line, can have two or more parallel lines with the known line.

Science of science research has shown that, This kind of non-european geometrical axiom, not only with words writing errors, and logic errors, and thus cannot be established.

So the conclusion that anyone who all established on the basis of roche non-european geometry theory, including higher dimensional space-time theory, belong to a pseudoscience.

7. The Generality of the Universal Unification

7.1 Event horizon of the universe and the whole universe

Current that universe is called the event horizon of the universe by science of science, which by human can be observed and described. Outside of the event horizon of the universe is a whole the universe, to the whole universe, human beings can not to describe at present. As a result, human physics can be divided into level 3.

7.2 Level 3 physics

All the physics can be divided into 3 level physics: "general physics, "advanced physics and, "superior grade physics".

7.2.1 The general physics

Universal gravitation as the core of the physics, namely Newtonian physics, is called "general physics", this part of the physics mingled with the "theory of relativity" and "quantum mechanics" two parts of contents of pseudoscience.

7.2.2 Advanced physics

Using the universal equation to solve the universe, and as the basic content of physics, is called "advanced physics" (see appendix 2).

In "the general physics and "the advanced physics" theory scope, all Einstein's theory, with "the big bang theory, "special theory of relativity "general theory of relativity", completely no actual meaning, belongs to the pseudoscience.

Between "advanced physics and "general physics", the main difference is that, general physics has only the law of universal gravitation, in this state, the universe always has infinitely many solutions.

But in "the advanced physics", because of [the universal equation], so the universe, not only has the only steady state real-time accurate solution, and the universe has the birth, death, illness and old age of the dynamic solution.

7.2.3 Superior grade physics

to study advanced physics of the event horizon outside whole big the universe of the physics, called "superior grade physics". Superior grade physics to solve physics problems include:

First, the advanced physics of the event horizon outside is what kind?

Second, how big is the whole universe?

Third, advanced physics beyond the event horizon, the whole universe, what are some laws of physics?

Fourth, the advanced physics' vision of the universe how to creation and survival in the whole universe?

This section includes, the universe can be isolated universe blast, such as "nova outburst and "supernova explosion". Whole universe not may have a big bang problem.

So, Einstein's overall the big bang theory, is unfounded.

Fifth, the cosmic background radiation, is the study of whole the universe for reliable source of information, this should be a important basis and contents of the "superior grade physics" research.

7.3 The nine big unified law of physical of event horizon of the universe

7.3.1 the first rule -- the universal unified absolute space coordinate system

Event horizon of the universe is in the universe unification of absolute space.exists and runs.

Absolute space is like using a three orthogonality square edge -- absolute space coordinate system, fenced up a big 'fish tank', there are many 'goldfish' - - celestial objects or group in 'swimming' -- brown motion.

The reason is simple: some objects, such as the solar system, or celestial objects groups, such as the Milky Way, have the revolution and rotation, if objects group orbiting size is too large, there will always be celestial group orbit of the cross.

The end result of these objects cross movement, can form the universe celestial objects or group of Brownian motion.

7.3.2 The second rule -- the universal unified absolute time coordinate system

the universal unified absolute time coordinate system, like a straight line number axis of equal scale, number axis coordinate origin is in the Christian era first year, January, New Year's day, zero, zero, LingMiao. The origin of coordinates, people can accord to need, put into any point of the number axis, forms the "relative time".

7.3.3 The third rule, the universal unified law of mass conservation and the law of conservation of matter Visible and invisible mass m in the universe and its sum total, is an absolute eternal invariable physical quantity. [The law of conservation of mass], [substance immortalization law] are all established.

7.3.4 The fourth rule - the universe unified [conservation of energy]

All the energy in the universe, including light, heat, radiant energy, electromagnetic energy, kinetic energy, potential energy, mass energy, and the total energy is conserved. This is [the law of conservation of energy].

Energy in the universe, including light, heat, radiant energy, and the mass energy, all has its corresponding exact mass m :

$$m=E/cc$$

All moving objects in the universe, including celestial body, all have the mechanical kinetic energy $T1 = 0.5 mVV$, and radiant energy of movement $T2 = 0.5$

mVV , then there is whole kinetic energy $T = T1 + T2 = mVV$.

Above, m for the mass of moving object, V for its speed.

In the universe, all energy E occupies the corresponding mass m .

In the universe, there is no no mass' energy, also does not exist without the energy's mass.

Einstein's theory of relativity "mass - energy relationship" thinks that "the mass turned to be no the mass of energy". This concept is totally wrong, need to be banned immediately!

The universe does not exist "dark matter and "dark energy".

7.3.5 The fifth rule -- the universal unified fundamental particles

All matter in the universe, objects, celestial body and all kinds of energy, without exception, are made up of one of the most fundamental particles, the most fundamental particles is 'neutrino'.

Neutrons and protons, electrons, all are composed of elementary particles smaller -- neutrinos.

Neutrons can be seen as the universe's largest neutrinos.

Neutrinos, full of the whole universe space constitutes the gravitational field of fundamental particles, transmit universal gravitation.

7.3.6 The sixth rule -- the universe unified absolute equation

The universe unified absolute equation, is the Lorentz force equation. Expression is as follows (cgs system):
 $F = (qq/rr) (1-VV/cc)$

In the : F as lorentz force between two moving charges, Q for charges, R as the charge interval, V as the charge motion of absolute speed, c is the speed of light.

Science of science study shows that, when moving charge velocity V is equal to or greater than the speed of light c , Lorentz force equation still is set up.

At the time of V is equal to c , Lorentz force is zero.

When V is larger than c , Lorentz force F from repulsion become attraction, this kind of gravity is the source of macro cosmic universal gravitation.

1) Universe unified absolute equation deduction 1

Everything begins to grow on the earth depends on the sun, everything begins to grow in the universe depends on Lorentz (force).

The reason is very simple, in the Lorentz force equation, when charged particle velocity is greater than the speed of light, Lorentz force will change from repulsion to attraction. This gravity is huge, because can sustain superluminal motion particles produced by the spin large centrifugal force. It is this gravity, making all kinds of fundamental particles, electrons, protons and neutrons, could be stable spin, and thus be able to generate the cosmic inventory.

So the conclusion must be: the cosmic inventory growth depends on Lorentz (force). Or it can be said that the growth of the cosmic inventory depends on the super velocity of light.

So can say, Einstein's theory of relativity "principle of constancy of light velocity", is the anti-science and reactionary universe theory.

The reason is very simple, no superluminal, there would be no neutrons, protons and electrons, therefore, there is no the cosmic inventory and celestial body.

Einstein's "principle of constancy of light velocity" of another mistake is, this principle is can't be logical proof at all, so, can not be called 'principle'.

"Principle of constancy of light velocity" the third mistake is, can't make an accurate expression with accurate language, be omitted. So science of science completely clamp down on Einstein's theory of relativity.

The universal unified absolute equation corollary 2

In the universe, the superluminal is generally the physical phenomenon of objective existence.

In the universe, all the spin of the particle is at the speed of light motion on average: the outermost is superluminal motion, such as protons, neutrons, and neutrinos.

And neutrino superluminal movement, have been "hadron collider" in European laboratory confirmed, be omitted.

So, Einstein's theory of relativity "principle of constancy of light velocity" is completely wrong.

3) The universal unified absolute equation corollary 3

All matter in the universe is average spin at the speed of light, and therefore can have mass energy: $E = mcc$. Electron superluminal spin, is an exception.

4) The universal unified absolute equation corollary 4

In the universe all of the mass m of the mass energy $E = mcc$, can be released and used by people.

For example, general physics 'atomic weapons and

'nuclear weapons' is used in the nuclear reaction the mass energy of the mass loss part.

In the "advanced physics of the "physical reaction", simulation of cosmic explosion, can release and use material of all mass' energy: $E = mc^2$. Therefore, if made into "super weapon", its power is enormous:

If say the power of atomic weapons is one hair / nine cattle, then say, super weapon power is the nine cattle / one hair, without equal in strength!

But, new science of science, no longer allow any aspirant rulers and unscrupulous businessmen in collusion, with super weapons to wage war. This career can only be used for peace.

5) The universal unified absolute equation corollary 5

Use the mass energy becomes super cheap new sources of energy.

New science of science can make super weapons matterial mass energy, continuous slow release out, will be a "super cheap new energy".

This kind of new energy, human is inexhaustible, with endless!

7.3.7 The seventh rule -- the vision of the universe unified "charge-speed relations"

"Charge - speed relations" can use [charge - speed theorem] to describe.

[Charge - speed theorem]: in the universe, particle charge quantity decreases with the increase of velocity. The following is changes in expression:

$$Q = Q_0 \left(1 - \frac{V^2}{c^2}\right)^{0.5}$$

In this, Q_0 for particle original charge quantity, q for particles in velocity V , the apparent charge quantity, c is the speed of light.

When the particle velocity V is equal to the speed of light c , particle charge capacity is zero, Lorentz force also is zero; When the velocity V is greater than the speed of light, the plus or minus charge carriers all become into the negative charges; Lorentz force from repulsion to attraction.

7.3.8 The eighth rule -- the four fundamental forces of the unification

The so - called four big basic forces in general physics: they are gravity, electromagnetic force, strong and weak force.

Among them 'strong and 'weak force' because ordinary physical defects and to be concocted out, then rest, is only the unification problem of the electromagnetic force and universal gravitation. Because the essence of universal gravitation is a kind of electromagnetic force (refer to the sixth laws above). So, the universe unification on one kind of fundamental forces, this is the electromagnetic force, also is the Lorentz force.

So the electromagnetic force is source of universal gravitation.

7.3.9 Ninth rule -- the universe five basic particles

There are five in the universe, only five, fundamental particles: neutrons and protons, electrons, photons and neutrinos.

The five basic particles are: neutrons and protons, electrons, photons and neutrinos.

Among them the neutrino is equivalent to "the earth of "gold, wood, water, fire, earth"; native to come out "gold, wood, water, fire; and "gold, wood, water, fire" (neutron proton electron photon) are growing out everything in the world, and the entire universe.

In the ordinary physics, elementary particles of the standard model theory think, the universe is composed of 62 species of elementary particles, one of them is called the higgs particle, also so - called "God particle", it is understood that the God particle is completely ordinary physicists themselves fabricate out. Even though the rest of the 61 species of elementary particles, all are high energy physics experiment results, but they are also, when nucleus by high energy particles bombarding, nucleus broken, produced the random odds debris, nothing more.

The random odds debris generated when high - energy particle bombard nucleus, are by general physics called "elementary particles", obviously this is a blind man touched the elephant guesses. So, the random odds debris of the 61 species of debris, neither not represent the structure of the nucleus, nor "elementary particle" of the universe

So, general physics need that, the science of science bring order out of chaos, completely negatives relativity and quantum mechanics, turn the tide, step on new stage -- "the advanced physics". This is the human right vicissitudes of life.

8. The world science revolution

1) Have the basic principle of universe science, axiom, as well as the new century science of science of the four cardinal principles: "clear concept, "accurate definition, "reasonable logic, "strict rules", can standardize and unify the human all science,

2) Be the first to be affected is, completely overturn Einstein's theory of relativity and quantum mechanics, Because they are neither conforms to the basic principle of universe science, also do not conform to the science and the four cardinal principles, so out and out is two largest pseudoscience,

The science of science, reforms the human physical science, language philology, philosophy, natural science, social science and all science.

4) The modern scientific revolution in the world is already arrive, scholars have to brave face! Ordinary people and the politics is no exception -- have to brave face!

9. The Datong World Lingua Franca

9.1 Datong world lingua franca of great significance

Human pursuit of Datong world has a history of more than 2500 years. Nowadays the world while wind and cloud is transforming, but all the human, including the fist, civilian, scholars, in the inner world, there is a selfish intend about idea of world datong, just these selfish intend is all sorts of strange things.

Science of science research conclusion, world datong selfish intend, can be summed up in two categories:

Force unifies world; cultural strength unifies world.

Many people tend to force unify world. But after just force unify world, Establish a dictatorial regime, this is most difficult to accept regime for people of majority. To say the least, after force unification, cannot avoid "long period of division, close long will points" of the historical absurd circle.

So important task of the unification of the world eventually needs cultural unity realize.

Someone said, culture is no reliable power, to unify the world.

The new science of science study shows that, this can only say that your culture is not power, scientific culture, however, the real scientific culture, sacred science and culture, its power would be giant hard to imagine for you.

So, the unified sacred task of the world falls on the real science, sacred science's shoulder.

Of course, in you hand the specious hazy subjective thoughts is not science, also don't sacred; in you mind those to obey some kind of politics also is not science, is hired thug; by rulers to play with those things around you, also not science. is the social prostitute. All are not holy, no unify the world of the charm. The new science of science research conclusion:

Only through definition, science is people can believe in the truth, also the name matches the reality and selfless; in addition to this, heaven and earth is no longer have the truth!

So friends, please believe, rely on, learn, advertise, research, develop and utilize science!

Science not only takes you to the truth, and invincible brings your success!

No, take your holy!

In addition, the science of science has the inspectability -- the theory of testing the truth -- this is the only criterion for testing the truth -- useless through practice inspection link prior testing the truth - - useless to surface inspection corrupt official corruption in advance!

So, the science of science is to test you:

The true or false public servant of a stepping-stone to success, good morning lacuna (咚咚); the touchstone for public or private; revolution or counter-revolutionary natural watershed; also is the monster-revealing mirror, never fade! -- all kinds of the monsters and demons is immediately show oneself in one's true colours!

Science of science is not only testing anyone of any theory in advance, and prior inspect anyone's behavior and every day: science or pseudoscience? Or a lie / false / fraud!

The reason is very simple, science is not just 'scientists' stuff in his hand, science is just around your corner, your everyday behavior and have science or not. So, science of science can test your every day.

Through the science test, all human words and deeds, including fist, scholars, vulgar people, most is the pseudoscience, fallacy, lies or fraud!

The reason why science of science culture theory was able to lead humanity unify the world and achieve Datong, main because science of science culture theory has the following three aspects advantage:

The first advantage: science of science can unify global language, therefore, this is a prerequisite for unify world.

Second advantage: the theory of science of science is only trustworthy the science truth for the grand unification of global human.

The third advantage: science of science not only uniformly manages global politics, can close the global ruler firmly into iron cage, only allow them to behave, don't allow them to be unruly in word or deed. If yes, it's going to be any other theory, human thought, doctrine, ism, are powerless.

72 kinds of science in the universe, cover literary history and philosophy and Military Science of Sun Zi plus the anti-norm, I all-pass postdoctoral, 18 foreign languages travel round the global village, hold high-tech seminar tour around the world, I don't know how science so magical! -- a famous scholar to puzzle.

It is a pity that, although you are 18 sets of martial arts, 36 stratagem, 72's good fortune, but no quick - sighted of erlang - Yang (Chinese) only, and only can be a China central television (CCTV) small disciple, will only going to approaching science, no matter how near, all is outside the science category; don't walk into, into the science!

So, unify the world, achieve Datong, is in the science of science of the maneuverability at planning.

9.2 Unify global languages - the first step to unify world in operability

Science of science research conclusion, to unify world the first condition is to unify the global language.

Without a unified global language, the world can't be unified.

The reason is very simple: various countries in the world, without exception, rulers using their native language effectively implements characteristic govern, and so, all countries in the world of language may not be universal. Although English is the main working language of the UN, and many countries also use English, but could never become a global language. Precisely because English governance idea and standards for the other country do not match, not only the language of different countries can't general, the language in "one country, two systems", also cannot to be general. Here is not only the difference of traditional Chinese and simplified characters problems, more main reason is the different of political conception.

It is clear that every country political system, choice of words are very sensitive to picky.

And so Scholars have thought is able to read silently from each country's dictionary out corresponding political atmosphere.

Such as:

Guide our thoughts of the theory basis is sir and Noble superior theory; leader our core strength is mending the sky of the nuwa.

Guide our thoughts of the theory basis is the way's spirit of the warrior, leader our core strength is the sun below the emperor.

Guide our thoughts of the theory basis is the statue of liberty, leader our core strength is ruling in turn two parties.

It is enough to show, various countries of dictionary can't universal.

And so, in all efforts to create international Esperanto scholars, there is a certain settled the common idea: any artificial language, are not deflect to a country. This is called artificial language of 'neutrality'.

But human existing the creator of all synthetic language, also don't know, artificial language of 'neutrality' is only decided by "the universal big dictionary". Relying on the author's subjective desire alone, 'neutrality' cannot be successful, also is unable to realize.

For example, 'democracy and 'human rights' problems, as long as in the inevitable kingdom -- the reality of human society, no matter how you 'explain or 'translation', are all not global universal, so you can not guarantee the 'neutrality', at least as every country has their own 'democracy and 'human rights' of the meaning and position location. Only you come the Freedom Kingdom, in the 21st century new science of science of world, Can just to correct 'explanation and 'translate 'democracy and 'human rights' problems. And therefore must be global universal, natural can ensure artificial language -- "datong world lingua franca" of the neutrality (see the following).

Is because of the existing national language around the world, including the existing artificial language, is impossible to global universal, many scholars in the world, with

lofty ideals, and still are trying to studious create and exploit artificial language, all these efforts will be useless.

And the United Nations educational, scientific and cultural organization in 1985 has been post in global ngos application of Esperanto, Just tried to use

Esperanto as a lingua franca.

But not able to, and will not be able to, and always can't succeed!

The reason is very simple, science of science research shows:

So far, humans have created hundreds of international esperanto, however, including the current popular Esperanto, never can do language of "sound - shape - meaning" three unification, especially can't do the unification of the 'meaning'. Therefore never become a lingua franca. Want to be global universal, artificial language have to do "sound - shape - meaning" three unification, especially need to achieve the "meaning" of the unity.

Sadly, all the scholars not only, and include the United Nations educational, scientific and cultural organization, did not know, language of the 'meaning' the unity of the importance of the problem.

The reason is very simple, artificial languages, can't do 'meaning' of global unity, will appear the following awkward situation:

An artificial language for example, Esperanto, new article, let 200 countries for translation, there will be 202 kinds of translation results. Among them there is a God result, and also one country two systems can have two kinds of results, because of.

So such artificial language, including Esperanto, is not likely to become the lingua franca.

The reason is very simple, if artificial language can't do the unification of the 'meaning', needless to say language 'democracy and 'human rights', all countries in the world have their own standards and concepts, even let each country to translate about 'science', the results will be all sorts of strange things: some translates science into scientists hands of gadgets; some translated into serving politics of the tools; some translated into some hazy subjective intention knowledge system; some translated into that, which let rulers to play with the things -- social prostitute; some translated into the master's servants; some say science is a double-edged sword, good or bad each half and so on. Therefore, thus article let 200 countries for translation, there will always be 202 kinds of results.

9.3 "Datong science dictionary -- "Science Grand Dictionary" of creation

Science of science research conclusion:

The human wants to create a global universal artificial

language, must to use global universal "Science Grand Dictionary", that is, "datong science dictionary" to support. There is no universal big dictionary support, all artificial language, including the current epidemic of the Esperanto, is absolutely impossible to become a universal language!

Science of science research as well suggests, creating a global universal grand dictionary, how easy to talk about?!

No level of the 21st century science of science, global any scholar, all can't create global universal grand dictionary.

Science of science research again suggests, global universal big dictionary, "Science Grand Dictionary -- "Datong Science Dictionary", need characteristics at the same time has the following three aspects:

The first characteristic: beyond the world's political and religious prejudice, and the local conditions and customs of various nationality of the world.

Second feature: covers the world's political and religious ideas, and local conditions and customs of different ethnic customs.

The third feature: cover and transcend the various countries in the world dictionary.

It goes without saying:

The 21st century new science of science has completed the "Science Grand Dictionary", also namely the "Datong Science Dictionary", the manuscripts compiled, to reference in June 2012 issue of the "modern Chinese dictionary", included in word 13000 and 69000 words are included.

9.4 To create Datong world lingua franca

There is a global universal big dictionary, "Science Grand Dictionary, i.e. "datong science dictionary", you can create the lingua franca of the world. This is called the "Datong world lingua franca" -- an artificial language.

"Datong world lingua franca" has been founded by the new science of science.

9.5 The Datong world lingua franca "sound - shape - meaning" three unification

1) Datong world lingua franca of the word 'shape' Datong world lingua franca do kana glyph with 26 Latin characters, they are:

Aa, Bb, Cc, Dd, Ee, Ff, Gg, Hh, Ii, Jj, Kk , Ll, Mm, Nn, Oo, Pp, Qq, Rr, Ss, Tt, Uu , Vv, Ww, Xx, Yy, Zz

2) Datong world lingua franca of the 'sound'

Datong world lingua franca of pronunciation with the Chinese pinyin is exactly the same. Be omitted.

3) Datong world lingua franca of the "meaning"
Datong world lingua franca of the "mineaing", by "Scientific Grand Dictionary, i.e. "Datong science dictionary" is only ascertained

4) The composition of datong world lingua franca
Datong world lingua franca is using three Latin character encoding a Chinese syllable (can use the fourth fifth characters to distinguish homophone), to constitute the language system

Datong world lingua franca of the sample text
With Datong world lingua franca constative Chinese song "volunteer march" lyrics, as follows:

义勇军进行曲
Yip ysk jpc jnd xyf quw

Qic llb	起来
Bub yrd zoh nuj lil de rff mff	不愿做奴隶的人们
Bab wog mff xtgr rxb	把我们的血肉
Vuh igb wog mff xnm de ihb igb	筑成我们新的长城
Vsu hwf mmb zun dkd lcc	中华民族到了
Zvx wze xmw de uiv hbf	最危险的时候
Qic llb	起来
Qic llb	起来
Qic llb	起来
Wog mff wjd vsh yia xne	我们万众一心
Mlx ve dif rff pkt hos	冒着敌人的炮火
Qmr jnd	前进
Mlx ve dif rff pkt hos	冒着敌人的炮火
Qmr jnd	前进
Qmr jnd	前进
Qmr jnd jnd	前进进

6) Datong world lingua franca translation
Due to Datong world lingua franca has achieved "sound - shape - meaning" three unification, a datong world lingua franca of the new article, also let 200 countries for translation, as a result, 200 countries translation will be the same. This is because, there is the universal "datong science dictionary", and already realized the unification of 'meaning'.

7) Datong world lingua franca of the 'neutrality'
Datong world lingua franca although adopted Chinese pronunciation, but it does not show that datong lingua franca is deflection to the China. This is because the datong world's lingua franca of the 'neutrality', is only determined by the "datong science dictionary".
To this, people need to have a brain teaser!

8) The advantage of Chinese
Datong world lingua franca so use Chinese pronunciation rules, is due to highlight the superiority of the Chinese language in the world, perform the following:

The first, as long as the grasp of the 3000 Chinese characters, people will be able to read through Chinese newspapers.

The second, people need to grasp 15000 words, will be able to read through English newspapers.

The third, the survey data show that, a half of the students in the United States, not with the help of a dictionary, not read through the New York times

The fourth, the survey data to see that, no college students in China, not with the help of a dictionary, not read through the People's Daily.

The fifth, 50000 words in Chinese word stock, can replace the existing English 1 million entries.

The sixth, English 1 million entries, it is necessary to relay memory can be competent for generations.

The seventh, Chinese can backward compatibility with English, but English can't down compatible with Chinese.

The eighth so Chinese is the language of the worlds most succinct easy to learn and to remember.

However, the United Nations survey data also has said: Chinese is the hardest thing to learn language in the world.

But, science of science study shows, the survey results, completely is a misreading of the Chinese advantage. The reason is very simple, because the Chinese semantics, in the world is most abundant, exquisite and colorful, other global ethnic languages, especially English, can't match.

The semantics of this "rich delicate and colorful" will inevitably cause learners considerable pressure, the pressure for the Chinese is no exception. For example, some research pointed out, for a single Chinese word 'old', there are more than 20 semantics. This is unmatched by other national languages. So, citing "rich delicate and colorful", to accuse the Chinese is the hardest to learn the language, it really is a misreading of Chinese superiority. People need brains to a sharp turn, start all over again!

But needless to say, Chinese pronunciation into datong world lingua franca, this shows that Chinese in international esperanto, has a unique character, this will be the aura of the Chinese culture, is worthy of honor.

9) Chinese version of "the universal declaration of human rights" translated into "Datong world lingua franca" of the text, sees the appendix 1
