What is philosophy? Create human grand unified philosophy

Shoucai Pan

Corresponding Author: [kexx003@163.com](mailto:kexx003@163.com)

Preface

What is philosophy? Since the beginning of human, for now, though, are not clear, people still struggling to explore, in the pursuit. In 2018 the upcoming conference to the 24th world philosophy, there are 99 grouping title, positive says, the world philosophy content is very "rich", looking from the negative, it also suggests that the current philosophy theory of very chaos. However, only about one out of 99 titles is true philosophy!

So, in this situation, answer what is philosophy? It is difficult to have the correct answer.

If you want to answer the question correctly, human beings must first have a set of methods or means, to check what philosophy is.

Days that——, Problem is becoming more and more complicated!

Where and how, to find inspection philosophy way?

Oh, suddenly remind of, a lot of people said that practice is the sole criterion for testing truth.

That -- you to give it a try!?

Um.....and think along while, also didn't come up with what is the practice to test 'philosophy'.

Have to look at logical reasoning: though the human has been practice for thousands of years, but still not able to check out what the truth, or philosophy!

To this, someone might be aggrieved!

So, would you please illustrate, you, human beings, with what kind of practice, examine what truth or philosophy?!

So must have a set of theory on logic, to test the truth and philosophy.

OMG, human, and I've never heard of a theory can test the truth and philosophy, even dare not even think about!

Oh, you haven't heard, there will always be able to hear, you dare not want to always can think of.

Thankfully, this theory has built up: this is the science of science -- about the science of science [1].

Studies have shown that, in the new century (21st century) science of science has examine ability -- theory testing science truth and philosophy -- this is the only standard to examine science truth and philosophy -- useless practical link, inspect in advance science truth and philosophy -- useless to surface, inspect corrupt official corruption in advance!

In this paper is to use theory of the science of science, inspect and create human grand unified philosophy -- philosophy of truth.

Keywords

Eternal absolute truth;  
Philosophy of truth

## Introduction

The philosophy of human existing chaos

### 2.1 The philosophy of the chaos can't bear

The above shows, the 24th world congress of philosophy of grouping title suggests, at least 99 types of schools at present philosophy. It is indicated that the philosophy of chaos and unbearable.

Science of science research shows that there are three basic reasons that cause this chaos of philosophy:

First, the historical reasons, congenital deficiency was history philosophy theories.

The second, historically, all philosophy scholars are theoretical incompetence.

Third, philosophical confusion of a technical reason is that, because humans have all of the language, without scientific unified specification defines (besides, including "philosophy" itself has no precise definition), logic language itself is a vicious cycle: 'black is white, 'good is bad, 'revolution is counter-revolutionary 'corruption is clean 'science is also pseudoscience 'relative is absolutely 'fallacy is truth' such logic generally true. And so this world there is no objective truth.

All sense are, as long as you have a mouth, is two layers of skin, how do you say, how are justified, strength is the commander in chief, fist lie is the truth! -- Global common is established.

For example, because there is no accurate definition 'science' itself, so 'science is also pseudoscience' logic nature was established; 'black is a kind of white', so the logic of 'black is white' also is established, etc. Isn't it?!

It is easy to think, this kind of situation, how can have truth and philosophy?!

So, the inevitable global philosophy is a mess! You said you, I said I right. 99 philosophy, have their respective rational.

So, true philosophy, where are you?

All human beings without exception are in the philosophy of disaster pain struggle!

Because, in the history of philosophy is congenitally deficient, later theory impotence technical

incompetence, so philosophy itself could not have examine ability, no strict definition and philosophy itself, so the present situation in the world of philosophy is: a genre is a philosophy, had a point of view and a kind of epistemology. Can actually be 'all flowers bloom together' and schools of thought contend. So can be science of science named 'cow B philosophy' -- the crow pecked cow B -- look for the one door. Including the Oriental philosophy: Chinese philosophy, Hindu philosophy, Islamic philosophy, Japanese philosophy etc; Western philosophy: Greek philosophy, Western medieval philosophy, Modern western philosophy, German classical philosophy, etc. Without exception all belong to cow B philosophy. The so-called philosophy of cow B is not global universal.

Only can be global universal, can be called the grand unification philosophy or 'truth philosophy'.

Also so, here has summed up a philosophy of law:

All 'philosophy' in front of the individual tag or label features, all is cow B philosophy.

Such as 'individual' label: 'Greek, 'Plato, 'Hegel, 'Kant, 'eastern, 'the west' and so on.

For example 'feature' label, 'Dialectical materialism, 'analysis, 'language and 'ontology', etc.

Can also be conclusion, in front of the 'philosophy', there can be only common language tags.

For example: 'big unification and 'truth' of a few public labels.

And religion, completely without exception, all belong to the subjective consciousness and all its reasoning. Thus all the religious doctrine and theory, are not in the realm of science, so all is not philosophy. About this, almost, beyond all people expected, need remind the entire philosophy person of attention, cannot ambiguous.

### 2.2 Philosophy of chaotic three peaks

Human philosophy first chaos peak: in the 1883s - 1884s, German philosophy scholar Nietzsche declared "God is dead".

The second chaos peak of human philosophy: Albert Einstein said, "Philosophy can be considered to be the mother of all science".

The third chaos peak of human philosophy: Hawking (UK) in "the grand design" proposed "philosophy is dead".

Among them, the peak of the philosophy of the second chaos, at the same time, also is the peak of the human science chaos. The reason is very simple: Einstein said

that philosophy is the mother of all science, in fact, is to make the philosophy on science. To enough explain human science and philosophies are very confusion.

The new progress in the science of science  
Human beings came to the 20th century, upper formation, From Europe to create and progress of an emerging science -- about the science of science -- the science of science. In the 1930 s, J.D.Bernal (UK) has published "the social function of science". Thus he was awarded the 20th century world science of science authority laurel.

Humans came to the 21st century, the new century; the science of science has made remarkable progress. "New Progress in Science of Science" [1] And "Science Freedom Kingdom" [2] published, Have to make clear the science of science, the great progress.

### **3.1 The expression of great progress on science of science**

The first, in the new century 'science' have strictly accurate only definition.

The second, in the new century science of science has four scientific principles: 'clear concept, 'accurate definition, 'reasonable logic, 'strict rules'.

The third, thus science of science has the inspect ability: theory tests science truth and philosophy -- this is the only standard to examine science truth and philosophy -- useless inspection link through practice inspecting in advance science truth and philosophy -- useless to surface, inspection corrupt official corruption in advance.

The fourth, so, the science of science is to test you: knocking at the door brick for the true and false servant, kuang kuang; the touchstone for public or private; revolution or counter-revolutionary natural watershed; still shine on a demon mirror of never fade -- all kinds the monsters and demons is immediately show oneself in one's true colours!

The fifth, science of science is not only testing anyone of any theory in advance, and prior inspection anyone's words and deeds of every day, science and pseudoscience?

### **3.2 In the new century science of science ten social functions**

The first social function of science: science leads global politics

The second social function of science: science will put the entire ruler firmly closed to the iron cage.

The third social function of science: science can be unified and standardized language

The fourth social function of science: science theory for testing truth

The fifth social function of science: science creates the universe space-time view

The sixth social function of science: science unified and standardized management philosophy

The seventh social function of science: science and unified standardized management the entire science

The eighth social function of science: science to create human thought doctrine (socialist) the grand view garden

The ninth social function of science: science to structure of human society the highest productivity

The first ten social function of science: science to create human happiness ideal country -- Science Datong -- Freedom Kingdom -- the only home to return to human society!

It is not hard to see, science ten social functions to make clear: science of science is the highest human biggest sacred management science, unify and standardize the management of all human beings, without exception, including philosophy. Also so, Einstein said "philosophy can be considered to be the mother of all science", is a big mistake.

Third science social function suggests that, science of science can be unified and standardized management of the global language.

Further research shows that unified specification defines language, in the universe, only has the responsibility and the ability, and is the science of science. Any other discipline and people, and God, there is no this responsibility and ability.

Philosophy had no language specification management of ability, let alone, Philosophy itself has no accurate definition.

So also, philosophy must and can only accept unified and standard management of the science of science.

And so, in the big family of science of science, there are disciplines mainly: language philology, mathematics, philosophy, sociology, the political economy, natural

science, and reveals the science of human beings itself and so on.

The relationship between them is: science of science is like a father, the rest are children.

Among them, the language philology be richly endowed by nature, ranking is the boss. The reason is very simple, this world, there is no any science is not use language to express.

Among them, mathematics is also very important, ranking is the second, the reason also is simple, without mathematics, your philosophy, take what to describe the world?

So, your philosophy at best ranking is the third child, mistress!

So, you henceforth not to reload the boss philosophy still outmatch above science, or is the mother of science?

So, too, not only theory of relativity Einstein completely wrong [2], and Philosophy is the mother of science theory is compound the error! This is classic don't understand science of science.

Create human grand unified philosophy

#### 4.1 Unified philosophy of language

Science of science go into suggests, human until today, there has been no grand unified philosophy -- "the philosophy of truth", the reason is that a technology, Human existing all of the language, because of without scientific unified specification defines, logic itself is a vicious cycle. Thus this world, there is no objective truth. All sense are, as long as you have a mouth, is two layers of skin, how do you say, how all right. Strength is the commander in chief, fist the lie is the truth! -- Global common is established.

Since problem of all around the world, always as long as have a mouth, you have two layers of leather, how do you say, how all right, so, the world philosophy conference 99 schools of philosophy, there are 99 mouth, each has each way, each has each reason.

Can be concluded that among the 98 schools, no a real philosophy, no one is the truth. So conclusion must be: human existing languages are all not can be used accurately describe any science truth and philosophy.

#### 4.2 Unified global language

Because of the existing human language cannot be used accurately describe the real

Philosophy, so, world congress 98 philosophy genres all speech is full nonsense. True philosophy must use language through scientific unified and standardized -- global unified language -- Datong lingua franca, to create.

Fortunately, the global universal "Datong lingua franca of the world" by science of science, has been created.

#### 4.3 Datong lingua franca of the world

For the sake of world lingua franca, human predecessors had already created hundreds of international esperanto, but including the current epidemic, and is recommended by the UNESCO, Esperanto, don't do it 'Sound-shape-meaning' three unification, in particular, failed to achieve the unification of 'meaning'. Such an international language, for example a UN Esperanto file, let 200 countries for translation, there will be 202 kinds of translation results, the reason is very simple, among them, a result of God, and there are two social systems in a country will have two kinds of results. Therefore, such an artificial language, including Esperanto, may not be global universal.

However, Datong lingua franca in the world takes the lead to achieve the "sound - shape - meaning" three unification, such a UN document, also let 200 countries for translation, the result will be the same. So "Datong lingua franca of the world" necessarily is global universal. So, the "Datong lingua franca of the world" will inevitably unify the global language, and will certainly become only working language of the United Nations. And then unify the world, achieve Datong.

#### 4.4 The Datong lingua franca of the text

Here is the Chinese song "March of the Volunteers" of lyrics sample expressed by the "Datong lingua franca of the world":

义勇军进行曲

Yip ysk jpc jnd xyf quw

Qic llb	起来
Bub yrd zoh nuj lil de rff mff	不愿做奴隶的人们
Bab wog mff xtg rbx	把我们的血肉
Vuh igb wog mff xnm de ihb igb	筑成我们新的长城
Vsu hwf mnb zun dkd lcc	中华民族到了
Zvx wze xmw de uiv hbf	最危险的时候
Qic llb	起来
Qic llb	起来
Qic llb	起来
Wog mff wjd vsh yia xne	我们万众一心
Mkx ve dif rff pkt hos	冒着敌人的炮火
Qmr jnd	前进
Mkx ve dif rff pkt hos	冒着敌人的炮火
Qmr jnd	前进
Qmr jnd	前进
Qmr jnd	前进
Qmr jnd jnd	前进进

"philosophy of truth" -- the creation of human grand unified philosophy

It goes without saying, true philosophy must be used the "Datong world language" to create.

This text using is Chinese, how to create?

Although literally here is Chinese language and characters, however, the meaning of Chinese characters with Chinese language and text is not exactly the same.

Here the meaning of words need adopt the "Science Grand Dictionary" -- "Datong Science Dictionary" to translate. Not can use "the Chinese dictionary" for translation.

### 5.1 definition of philosophy

Create philosophy, first need to define the philosophy. There are many definitions of philosophy in the history, two more representatives:

The first kind of representative definition: love wisdom and pursue truth.

In the definition of, "love of wisdom comes from Greek, "pursue truth" is translated result of Japan. Although this definition vaguely but can be a bit philosophical meaning.

The second kind of representative definition: philosophy is the generalization of natural science and social science knowledge and summary.

This definition, in the modern academic circles has quite a lot of supporters. Obviously this definition is not only a blur, but also is 'the mother of science' in disguised forms, specious, self-deception.

While, human grand unified philosophy, real philosophy, of the definition should be:

The so-called philosophy is a science about the truth. That is to say, philosophy is to give human looking for, found that research and use truth of a science. It is easy to understand, because of, all humans existing 'philosophy', do not gave human found a truth,

So also, human exist all 'philosophy' is invalid. In the existing 99 'philosophy' genre, 98 schools are all forged and fake commodity! Including human all existing philosophical definition, all invalid.

### 5.2 Definition of truth

It is obvious that real philosophical definition, only after the 'truth' clearly defined, philosophical definition will be effective.

There are two kinds of truth definition in the science of science:

The first definition of truth: science is the truth. Obviously, this definition is only valid after 'science' accurate definition [2].

The second definition of truth: unconditionally, eternal, absolute founding, effective logical proposition of philosophy is the truth.

For example, see a philosophical proposition: "the truth at the beginning is always in a personal hand".

This is a, unconditional, eternal, absolute founding, effective logical philosophical proposition: therefore, it is a timeless absolute truth.

Although so you say the 'truth' two definition expression is different, but the substance is exactly the same, be omitted.

Also, apparently, all scientific content of expression also must be "unconditional, eternal, absolute established effective logic proposition".

So the two kinds of definition of truth, the essence of meaning are the complete same

### 5.3 The creation of the truth philosophy

#### 5.3.1 The basic principles to create "truth philosophy"

First, create a discipline, first of all, there must have a through science unified specification definition, logic itself is no longer in the vicious circle, language system.

Second, you need to follow the principle and method on science of science.

Third, resolutely eliminate anyone's subjective consciousness.

Science of science study indicates:

Any science truth and philosophy, there are four basic attributes: immutability, absoluteness, objectivity and supra-class.

So, by the objectivity determined, any science truth and philosophy, all don't include and exclude anyone's subjective will. Anyone's subjective will, no matter thought is how much light, doctrine is how brilliant, belief is how pious, mind is how deep and euphemism, without exception, is neither science nor truth more than philosophy. So you have to rule out anyone's subjective will (consciousness).

Clearly, this article 3, the existing human philosophy didn't do it, it is impossible to do. The reason is very simple, all humans existing philosophy, i.e. philosophy of cow B, came to power all talking about 'epistemology'. Especially a relatively popular in the philosophy of 'ontology', openly declared: "outside the people's subjective consciousness and also exist the objective world". This 'ontology' is not only language vicious cycle, and the logic is not reasonable. So belong to typical fallacy, science of science resolutely banned it.

The fourth, create a philosophy, must start from the source of philosophy.

What is philosophy source? Where is the?

Science of science study, philosophy of the source is "exist or without". Philosophy source is not 'matter or spirit'. At "the altar of philosophy" the source of the philosophy was first discovered and advocated by Mr xiaoyaozi. So, philosophy can be expressed as source: this universe/world, is objective existence, or does not exist? This is 'yes' or 'no' of the problem.

Reasonable answer, of course, should be: 'yes' not 'no'.

So the conclusion, the objective existence of the universe/world, is philosophy topic content will be discussed.

So, create philosophy of truth begin from this source.

#### 5.3.2 Source of philosophy and the theory of 'consensus'

About the source of a philosophical discussion: the universe/world 'yes', is the universe / world objective existence, how to get to know and discuss then?

Many people, almost all people, all sorts of 'epistemology' and 'ontology' are up again. Little imagine, science of science resolutely banned all the epistemology. The rule is simple: they are people, without exception, personal subjective will (consciousness).

In history, typical of the epistemology mainly is 'God created the world, 'idealism and 'materialism and 'dialectics, 'Tao Can be Tao Uncommon Sense 'one divides into two, 'the theory of Yin and Yang, 'ontology' and so on.

Science of science study shows, all 'epistemology' in the history of error has three:

First of all, all of the theory including 'das capital', are people (individual) expression of subjective will. Determined by the objectivity, science truth and philosophy, does not include and exclude anyone's subjective will (consciousness). Anyone's subjective will (consciousness), no matter how much you thought are light, how splendid doctrine, How devout religious beliefs, how deep consciousness of euphemism, are all neither science, nor truth, more not philosophy.

Second, all the epistemology all is a person's subjective consciousness. So, science truth and philosophy are completely rejecting any personal opinion.

Third, regardless of the science, or the truth, and philosophy, all shall not from man's, personal, subjective consciousness proceed with and deeply. Must begin with objective existence, and must start from 'public awareness', launch and in-depth. So, 'public awareness' is the philosophical 'consensus theory'. To use 'consensus theory' is not only a philosophical method and also is one of the basic methods of science. 'Consensus theory and 'epistemology' is corresponding, 'consensus theory' is public, and 'epistemology' is a person's subjective consciousness. 'Consensus theory' belongs to the scientific method and theory, and 'epistemology' all belong to the individual, therefore, it is method and theory of pseudoscience. In true philosophy should be completely prohibited.

### 5.3.3 Philosophy exist [axiom]

The so-called philosophical 'consensus theory', that is used to create a philosophy [axiom]. Science of science requires, any discipline theory began, must be, also can only use 'consensus theory', to create a [axiom]. And not from any of the individual epistemology began.

For philosophy, need from the source of philosophy, by 'consensus theory' create philosophy exist [axiom].

It goes without saying, create [axiom] is not so simple, really need here is 'wisdom'! So, here need Greek philosophy parlance -- love wisdom.

Work hard! My friend, enjoy using your wisdom!

Obviously, to create [axiom], first of all need to make a scientific and standardized definition of [axiom].

[Axiom] definition: the normal intellect people, can use anschauung experience summarize out, basic law in nature of effective logic language propositions, is called [axiom].

[Axiom] attribute: any [axiom] can neither be logical proof, also can't be logical falsified. Each subject can have multiple [axiom].

For example, Euclidean geometry has only a basic existence [axiom]: Through a dot outside straight line there is only one parallel line.

Studies have shown that, philosophy at least, there are three [axiom].

### 5.3.4 Philosophy first existence [axiom]

Philosophy first existence [axiom]: the universe / world always exist objectively, it does not rely on anyone's existence and objective existence, also is not rely on anyone's subjective will and transfer.

Obviously, this [axiom] could not be by any logical proofed, also cannot be falsified by any logic. Therefore, this article [axiom] is also a timeless absolute truth.

There is obviously, the first [axiom] is not a person's anschauung experience, but everyone has the visual experience and consensus by normal sense, so this is also called 'consensus theory'.

Work hard, my friend, to open the wisdom of your mind, to create a human grand unified philosophy!

### 5.3.5 Philosophy the second existence [axiom]

Philosophy the second existence [axiom] also called time [axiom]. If the philosophy first existence [axiom] creation is relatively easy, because history has a similar philosophy expression, merely no one can just summarize existing [axiom], nothing more.

So the time existence [axiom] summary is quite difficult.

To want what time [axiom] of existing!

We have Greenwich astronomical time of the calendar year by default, very convenient.

Oh, not only you is very convenient, and all the scholars or all of the articles and politics, all is very convenient. They all have their own potential space-time view: God's, Islam, Buddhism and so on.

You as a wise man, an understanding heart, any same problem in the universe / world, will have different solutions, including inevitably different philosophy unbind: God, Islam, Buddhism, Greenwich and so on. So different, precisely because is their space-time views different.

Then, where is your philosophy? Where is your space-time view?

So, have to the conclusion that philosophy must have time space view, to just go.

Also so, philosophy must create the time existence [axiom] and space existence [axiom].

So, science of science has a most basic rule: no space - time view, no voice!

That is to say, any individual without exception, before the speech must be show space - time view, no space - time view have no voice!

But, I in the global cultural BBS has a wide range of voice, never listen to what your 'space - time view' -- Some people say that.

You are the inevitable kingdom [2] -- so far in human history. Now in the 21st century is Freedom Kingdom [2], can no longer allowed don't have the time space view, disorderly speak.

That, I as a humanist, never time space view!

Oh, you have no open time space view, but, you have hidden or potential time space view: God, Islam, Buddhism, and so on.

That not line! In the new century the Freedom Kingdom, anyone's comments, must be for open time space view. No time space view has absolutely any right to speak!

But, I as a humanist, can't create time space view, what do I do?

Oh, you can learn from other people's time space view. For example: God, Islamic and Greenwich Time space view and so on.

You don't have, and don't learn time space view, science of science resolute down your voice! You even can't to talk about philosophy. Have no voice!

Philosophy would have no time space view; create a time space view is of physics work! -- Some people say.

There are lots of people hold this view, but all don't know, physics, so far, have not conform to scientific space-time view. In physics, in Newton's time space view and Einstein's time space view, all don't conform to the science of science of specification, so are all invalid. Physics and philosophy are actually seeing each other in time space view.

Science of science study shows, reasonable time space view should be created by philosophy took the lead. The reason is very simple: observe the universe / world, time space view is the most basic key element. So, create a philosophy, the most important is to create the philosophical existence axioms, including the axiom of existence in time and space. So philosophy scholars must carry the responsibility and obligation of creating time space view first.

Obviously, also create the [axiom] of existence in time and space is much more than the first existence [axiom] difficulties. Because people have at least some other concept of time, especially is the relativistic space-time idea.

Create existence axioms, can be created with visual experience, can also by the reasoning of truth to create.

For example, time existence [axiom], can according to a truth -- an eternal absolute established, effective logical, philosophical proposition to create.

Please have a look at a philosophical proposition: "one cannot enter into the same river twice".

Obviously, this is a well-known scholar Greece Heraclitus creative genius of philosophical proposition, but not only Heraclitus himself, and even the future generations, up to now, still don't understand this proposition is a timeless absolute truth. The philosophical proposition, through science of science revision, more possess philosophical significance. Presentation as follow:

"One cannot step twice into the same long history".

It is not hard to see, according to the philosophical proposition is very easy to create the time existence [axiom].

The time existence [axiom]: time in the universe, is an eternal, absolute, uniform elapse, headless anury, used to characterize the physical quantity about all things in the universe order of priority and change process. It is objective existence, neither according to anyone existence, is nor according anyone's subjective will, shift and change, more not to transfer and change according any scholar logic deduction (Obviously, Einstein's theory of relativity time space view is completely wrong).

Time existence [axiom] inference 1: time has three natural attribute: long or short, more or less, uniform elapse.

Time existence [axiom] inference 2: time measurement can be used in the universe, radial number axis of the same scale to characterize:

Time existence [axiom] inference 3: time coordinate zero point in the universe can take: the AD, the first year, New Year's Day, zero, zero and zero.

Time existence [axiom] inference 4: The time of the universe forever never changes with whether the space object movement, also don't follow objects (matter), whether happen physical chemical or biological changes and changes or bend.

Please note that axioms and inference, they all possess the truth nature, can be used as truth.

Obviously, had time existence [axiom], philosophy scholar, You can talk about the existence of the universe, sports / speed, occurrence, development and change and so on. Otherwise, in the human existing all philosophical epistemology, talking about 'fast and 'slow and 'development and 'change', are all out of thin air, and therefore invalid. All were called the philosophy of cow B, all not a line in the future.

### **5.3.6 Philosophy existence third [axiom]**

Philosophy existence third [axiom] is the space existence [axiom].

To create the universe space axiom, can use the visual experience, can also be created by a truth. This truth is an eternal absolutely established effective logical proposition. This proposition can be expressed as:

"Two people are not able to step into the same at the same time long history".

The philosophical proposition is science of science in the world's first created.

Apparently this proposition is capable of embodying of the universe space concept.

Also, this thesis also absolute eternal objective set up and hence an absolute eternal objective truth. The truth is just the shows the natural attribute of the universe space. There can be used to create universe space existence [axiom].

Universe space existence [axiom]:

In the universe, 'space' is not according to anyone's existence and objective existence; also not according anyone's subjective will and change / transfer.

The 'space' definition: In the universe, any exist object (matter) place, are called space.

### **5.3.7 Universe space existence [axiom] of inference**

Universe space existence [axiom] inference 1: there are three of the universe space attribute: 'size, 'how much and 'location'.

Universe space existence [axiom] inference 2: All of the universe space attributes can use Euclidean geometry to represent.

Universe space existence [axiom] inference 3: Universe 'Space' is neither according to exist or not substance (body) in the space and the objective existence; nor according to space object motion or not and the objective existence.

Universe space existence [axiom] inference 4: all matter (object) in the universe, with the possession of the universe space forever never happen any physical, chemical and biological interactions.

Universe space existence [axiom] inference 5: universe space will not happen because the matter of space is in the physical, chemical or biological changes, and change / buckle. Universe space forever never bending properties

The creation of a grand unified philosophy

Obviously, there is a philosophy of the three existence [axioms], can create specific human grand unified

philosophy -- "the philosophy of truth". In the process of creating may also need some [principle] to support, therefore need for [principle] to make a clear explanation.

[Principle] definition: Academic theory has some basic rules of law, it is called the [principle].

For example, the [basic principle of science]: All science should follow four basic principles: 'clear concept and 'accurate definition 'reasonable logic 'strict rules'.

The similarities and differences among [principle] and [axioms]:

[Principle] and [axiom] of the common point: they are all science, including philosophy, the basic regular expressions: all is truth, eternal absolute truth.

[Principle] and [axiom] difference:

[Principle] can and must be able to be logical proof. And [axiom] neither can't by logical proof, nor cannot be falsified by logic.

With [principle] and [axiom], combined with the corresponding reasoning as preparation, you can begin to create grand unified philosophy -- "philosophy of truth".

Someone said, create philosophy in time-space, its contents are with natural science and the same!

Good, of course, natural science some content also is the basic content of philosophy. But there will be a lot of can't contain the content of the natural science. Such as natural science couldn't contain the content of the truth, and the truth of the content will be the main basic content of truth philosophy.

### 6.1 Discuss philosophy truth

Truth case 1: "truth at the beginning is always in a personal hand".

The truth eternal absolute objective set up thus is eternal absolute truth.

This kind of truth is the natural science cannot include. By contrast, "sometimes the truth in a few hands", this proposition although sometimes can also be set up, but not eternal definitely established, so this proposition, it is not the truth. And can only be science of science

named 'prejudice' -- a few prejudice -- philosophy prejudice.

In the same way, "the truth is sometimes in most people hands" proposition, nor eternal definitely established, therefore also belong to "prejudice" -- the majority of prejudice -- philosophy prejudice.'

Philosophy prejudice of definition: those sometimes can be set up (i.e., conditional), a theoretical proposition but not absolute eternal established, all called 'prejudice' -- philosophy prejudice.

For example, for the most part, Marxism theory of speech is all belong to 'prejudice' -- philosophy prejudice. Because they are not eternal definitely established, which is conditional.

On this basis, the truth philosophy content only consists of three parts: truth, prejudice and fallacy.

Then, according to the theory of philosophy of three most look at the Marxist theory:

First, Marxism theory of all, there is no truth. Because in all theory is no absolute eternal established effective logical proposition.

Second, in addition to the fallacy lies;

Third, all are prejudices -- philosophy prejudices

Dialectical materialism of lies fallacy, for example: "practice is the sole criterion for testing truth", that is extremely big lies fallacy.

The reason is very simple: humans have practice for thousands of years, but has not been able to test to get the truth through practice, a grain of truth.

Some people refuse to obey? Would you please illustrate: you, human beings, through what kind of practice get what kind of truth?

If you don't, for example, would you please in situ fall, and then try again.

Science of science research has shown that practice at all doesn't have a social function of testing truth. Practice the only social function, only is the touch stone across the river -- have stone then across the river, but no stones, don't cross, nothing more.

So, the conclusion: "practice is the sole criterion for testing truth" is extremely big lies fallacy.

Then the rest, for the most part Marxist rhetoric belong to prejudice, are all not eternal definitely established.

Again for the truth an example: politics must be honestly obey and serve the science, can't have the slightest mistake.

This is a timeless absolute truth.

Unfortunately, in the inevitable kingdom -- human history so far, science is to obey politics. No one can understand, only to the Freedom Kingdom -- politics obey science of the human society, this proposition is eternal definitely established, thus eternal absolute truth.

Obey the science, once have any mistakes, 'politics' immediately turns into the 'rule'. So 'politics and 'rule' is completely different philosophical concepts, should not be confused. Sadly, peoples often are confused. Some had no intention of confusion, some deliberately confused. As a result, human beings are in a disaster pain, need to wake up!

So, can the conclusion: the so-called truth philosophy that is a knowledge which is to give the human to look, find and research and utilize the truth.

But, eternal absolute established effective logical propositions, in this world there are very few! -- Some people say.

Don't you know? As long as kung fu deep, iron stick ground into a needle!

Eternal absolute established effective logic proposition is not only a lot more, and absolute truth eternal around run, see you looking for or not.

For example, "big brother big brother small", because is eternal absolute established effective logical proposition, thus eternal absolute truth.

Again for example, all scientific theoretical propositions also must be eternal absolutely set up effective eternal logic proposition, thus eternal absolute truth.

Such as the proposition, "in the standard condition, water at zero degrees Celsius starts freeze" This is an eternal absolute established effective logical proposition, thus eternal absolute truth and so on. So, "science is truth" proposition is also established, and is a definition of truth.

## **6.2 What is not a philosophy?**

Studies have shown that the following six things not philosophy first kind, who dubbed the individual title in front of the philosophy, that is not philosophy. For example: Hegel's philosophy, Plato's philosophy, Kant's philosophy, Nietzsche's philosophy, and so on.

The second kind, embodies the thought or ideology (doctrines) of stuff, all are not philosophy. For example, all religious philosophy is embodied religious beliefs (ideology). And for example, the new Old Testament, the Koran, Buddhist scriptures, there is the dialectical materialism philosophy, the idealist philosophy and so on. Also because embody of some kind of subjective consciousness, so not philosophy.

The third kind, embody philosophy of time or region may also are not real philosophy. For example: classical philosophy, the ancient Greek philosophy, western and eastern philosophy, medieval philosophy, modern philosophy and so on. The reason is simple, both time and geography, not a philosophy.

The fourth kinds, those who have special coreference of things are not philosophy. For example: ontological philosophy, so-and-so epistemological philosophy, analytical philosophy, philosophy of language, etc. The reason is very simple they have some kind of special coreference, so not philosophy.

The fifth kind, 2018 world congress of philosophy in grouping the title, there is only one subject of "world Datong" belongs to the true philosophy field. The rest of the 98 group topics are not real philosophy content.

The sixth kind, there are some out of consensus theory, also serve as philosophy come out.

Work hard, friends, research, extension of your philosophy truth, Efforts to construct the human grand unified philosophy!
